Professional Summary

Full Stack Developer with 1+ year of professional experience building responsive, API-driven applications using React.js, Next.js, TypeScript, JavaScript, HTML5, and CSS3, with backend experience in Node.js, Python, Flask, REST APIs, WebSockets, MySQL and MongoDB. Experienced in building reusable React components, managing application state, integrating backend services, and optimizing frontend performance through efficient rendering and state management. Strong foundation in object-oriented programming, Java, C++, Python, and Data Structures & Algorithms, with hands-on experience using Git/GitHub in collaborative development environments. Interested in high-performance, real-time applications and financial technology, particularly software supporting trading and financial markets.

Education

Kongu Engineering College Nov 2021 – Mar 2026
MSc Software Systems Perundurai

Skills

Frontend: React.js | TypeScript | JavaScript | HTML5 | CSS3 | Next.js | Bootstrap | React Native | Wordpress | Framer Motion

Backend: Node.js | Python | Flask | REST APIs | WebSockets

Database: MySQL | MongoDB

Languages: C | C++ | Python | Java | Object-Oriented Programming | Data Structures & Algorithms

Tools & Cloud: Git | GitHub | VS Code | Figma | Vercel | Chrome DevTools | Docker | AWS

Core Areas: API Integration | State Management | Responsive UI Development | Performance Optimization | Real-Time Applications

Leadership & Soft Skills: Team Leadership | Coordination | Organizer | Training & Mentoring | Project Leadership | Motivator | Analytical Thinking | Team Collaboration

Professional Experience

Junior Software Developer (Thiran360AI) Mar 2025 – Jan 2026
Gobichettipalayam

- Developed responsive web and mobile interfaces using React.js, Next.js, React Native, TypeScript, JavaScript, HTML5, CSS3, and Bootstrap.
- Built reusable frontend components and integrated APIs to deliver application features across web and mobile platforms.
- Supported full-stack development using Node.js and MongoDB for end-to-end application functionality.
- Used Git and GitHub for source control, collaborative development, and maintaining clean development workflows.
- Trained students in C, C++, Java, Python, HTML, CSS, JavaScript, React, Node.js, Django, MongoDB, MySQL, and Data Structures and Algorithms through practical programming sessions.
- Guided learners through software projects, logic-building exercises, coding practices, and technical interview preparation.

Full Stack Developer (AurAtects) Feb 2026 – Present

- Develop full-stack applications using Next.js, React.js, TypeScript, Python, Flask, and MongoDB, with emphasis on reusable components and scalable frontend architecture.
- Integrate REST APIs and WebSockets for frontend-backend communication, real-time data updates, and application functionality.
- Build reusable React components and manage application state to create scalable, maintainable, and responsive user interfaces.
- Optimize frontend performance through efficient state management, rendering optimization, and minimizing unnecessary component re-renders.
- Developed an LLM-powered conversational application with ChatGPT-like interaction and API integration.
- Use Git/GitHub for version control, collaborative feature development, and maintaining clean development workflows.

Projects

Kongu-ECom -- E-Commerce (React.js | Node.js | MongoDB | REST APIs | JavaScript | CSS)

- Built a responsive e-commerce application with product listings, category filtering, search, dynamic product views, and mobile/tablet/desktop layouts using CSS Flexbox/Grid.
- Developed reusable React components for product cards, modals, navigation, and cart functionality.
- Integrated REST APIs with the frontend using Fetch/Axios for product and cart operations.
- Implemented Node.js backend services and MongoDB data handling for product and e-commerce operations.
- Optimized React rendering and application performance through component memoization and efficient state management.

Jewellery Shop Management System (React.js | Node.js | MySQL | REST APIs | Bootstrap)

- Developed a responsive jewellery e-commerce interface with multi-category product pages, dynamic routing, and detailed product views.
- Built reusable React components and responsive layouts using Bootstrap for consistent mobile and desktop experiences and implemented a virtual try-on feature using webcam access and browser Web APIs.
- Integrated REST APIs with the Node.js backend for product and user-related operations.
- Implemented form validation, smooth navigation, and custom UI logic to improve user interaction.
- Managed cart and user state globally using React Context API.

Booking & Management System (React Native | Python | REST APIs | WebSockets)

- Developed a cross-platform React Native booking application for salon, gym, hotel, and spa services.
- Built appointment scheduling, slot selection, availability, and booking management screens and implemented real-time appointment and availability updates using WebSockets.
- Developed admin and staff interfaces for schedule updates, service management, and booking operations.
- Integrated REST APIs for service listings, bookings, user authentication, and application data.
- Optimized React Native performance through efficient list rendering, minimized re-renders, and optimized state updates.

Publications

IEEE-indexed International Conference Mar 05, 2026

Predicting Course Ratings Using Random Forest Regression

NPTEL & Credit Courses

Robotic Process Automation Dec 2022 – Feb 2023

Social Networks Jan 2025 – Apr 2025

Certifications

ORACLE APEX Cloud Developer Jan 2025 – Mar 2025
