AMIRTHA POORANI M

Aspiring Technologist | Data, AI & Cloud Enthusiast | AI & Data Science Graduate

9626756879 | amirthapooranim@gmail.com | linkedin.com/in/amirtha-poorani-manimaran-481168357 | Thiruvarur, Tamil Nadu

PROFESSIONAL SUMMARY

Final-year AI & Data Science student with a strong analytical and structured problem-solving mindset, demonstrated through 100+ deployed AI chatbots and a full-scale mobile app built end-to-end. Comfortable learning new tools quickly, taking ownership of projects from concept to deployment, and collaborating with cross-functional stakeholders. Two prior internships in Network & Security and Web Development, with growing interest in how data, AI, and technology can improve business decisions. Eager to bring this initiative and adaptability to a fast-paced, international environment.

EDUCATION

B.Tech, Artificial Intelligence & Data Science	Sir Isaac Newton College of Engineering & Technology	2027	CGPA: 8.2 (up to 6th Sem)
XII (HSC)	GHSS SRI.G.R.M., Thiruvarur	2023	78%

INTERNSHIP EXPERIENCE

Network & Security Intern *Jun 2025 – Jul 2025*

Surabi Technologies

- Assisted in monitoring and maintaining network security protocols and firewall configurations.
- Gained practical exposure to network topology, VPN setup, and security threat analysis.
- Supported the team in identifying vulnerabilities and implementing basic security measures.

Web Development Intern *Dec 2025 – Jan 2026*

E-Soft IT Solutions

- Developed and maintained web application features using HTML, CSS, and JavaScript.
- Collaborated with the team on UI design, testing, and deployment of web pages.
- Gained understanding of the software development lifecycle and client-side technologies.

PROJECTS

AI Chatbot Suite — 100+ Chatbots Built *Flask, Google Gemini API, Firebase Firestore*

- Designed, built, and deployed 100+ domain-restricted AI chatbots — including CloudMate AI (cloud computing), TrafficMitra (Indian traffic rules and licensing), SINCET-BOT (college information), and Domain Tuner (multi-domain use cases like healthcare and legal) — using a reusable Flask + Firebase Firestore + Google Gemini architecture with keyword-match retrieval and LLM fallback for accurate, in-scope responses.
- Implemented multi-user support with Firebase Authentication and user-scoped Firestore data isolation, file upload processing (CSV, XLSX, JSON via Pandas), fuzzy matching, and per-user session handling via UUIDs; deployed live on Render with secure environment-variable-based credential management.

ApprovalHub – Leave Management App (Android) *React Native (Expo/TS), Firebase*

- Built and shipped an Android app automating the student → class-incharge → HOD leave/OD approval workflow, replacing paper-based leave letters, with role-based dashboards, real-time status tracking, and Firebase Auth + Firestore backend.
- Implemented attendance-driven leave advisories (auto-calculated attendance % with color-coded guidance), document upload for 3+ day leave/OD requests, department/year-scoped access codes, and monthly approval reports for HOD; built and installed a working Android APK via EAS Build.

RAG-Based Chatbots *LangChain, ChromaDB, Ollama / Gemini API*

- Built two Retrieval-Augmented Generation chatbots: a fully offline RAG assistant using Ollama (Llama 3.2), sentence-transformer embeddings, LangChain, and ChromaDB with no external API dependency, and a Gemini API-based RAG chatbot for SINCET college knowledge assistance built to the Training & Placement Cell's reference architecture (LangChain + ChromaDB + Streamlit).

Earlier Projects

- Ninaivu – Memory Assistance App: mobile-friendly app to help elderly users manage daily tasks and reminders.
- Accident Detection System (IoT): Arduino-based system to detect accidents and send automated emergency alerts.

SKILLS

Cloud & Networking: Cloud Computing Fundamentals, Networking Basics (TCP/IP, DNS, HTTP), Network Security, Render (Deployment)

Programming Languages: Python, C, JavaScript (basics), Bash Scripting (learning)

Agentic AI & Chatbot Development: Flask, Google Gemini API (google-genai SDK), Firebase Firestore, Firebase Authentication, Retrieval-Augmented Generation (RAG-lite), Prompt Engineering, Domain-Restricted Conversational Design, Session Management (UUID-based)

Web Technologies: HTML, CSS, JavaScript (basics)

Data Handling: Pandas, CSV/XLSX/JSON Processing

Tools & Platforms: Git, GitHub, AWS (learning), Microsoft Excel, Word, PowerPoint

IoT & Hardware: Arduino, Sensor Integration

CERTIFICATIONS

- Introduction to Cloud Computing — Simplilearn SkillUp
- Building and Deploying Applications with Google AI Studio — HCL GUVI
- Human Computer Interaction — NPTEL
- C Programming Certificate

EXTRACURRICULAR ACHIEVEMENTS

Secured 2nd Place in Logo Design at SIMATS Engineering College and Dhanalakshmi Srinivasan Engineering College, Trichy; served as Student Trainer in C Programming (500+ programs); presented a technical paper at Hindhusthan Institute of Technology; and actively participated in multiple technical symposiums and workshops.

SOFT SKILLS

Analytical & Structured Problem-Solving • Learning Agility • Initiative & Ownership • Clear Communication • Cross-Functional Collaboration • Time Management
