CAREER OVERVIEW

Senior IT leader with 20+ years of experience in IT operations, infrastructure management, and enterprise technology governance, supporting environments of 1,500+ users across multi-site manufacturing and regulated industries. Proven track record in leading teams of IT professionals, managing annual IT budgets exceeding ₹2 Crore, and driving large-scale IT service delivery aligned with business objectives. Strong expertise in GxP, CSV, data integrity and 21 CFR Part 11 compliance within highly regulated environments. Experienced in Azure cloud readiness, migration planning, disaster recovery and business continuity strategy implementation. Demonstrated ability to lead cybersecurity incident recovery, ensuring minimal business disruption and strengthened security posture. Skilled in vendor management, contract negotiation, SLA governance and ITIL-based service management practices. Seeking a senior IT leadership position to leverage extensive experience in infrastructure management, regulatory compliance and enterprise IT transformation to drive operational excellence and business growth.

CORE COMPETENCIES

IT Leadership & Strategy
- IT Operations Management, IT Governance, Strategic IT Planning, Digital Transformation, Stakeholder Management, Team Leadership & Mentoring

Infrastructure & Security
- Data Center Management, Virtualization Technologies, Server & Storage Management, Network Administration, Cybersecurity Governance, Endpoint Security Management

Service Management
- ITIL Service Management, Incident Management, Change Management, Problem Management, Service Delivery, SLA Management

Compliance & Quality
- Computer System Validation (CSV), GxP Compliance, Data Integrity, 21 CFR Part 11, Audit Readiness, Risk Assessment

Cloud & Business Continuity
- Azure Cloud Readiness, Cloud Migration Planning, Backup Management, Disaster Recovery, Business Continuity Planning

PROFESSIONAL HIGHLIGHTS

- 20+ years of IT leadership and infrastructure management experience
- Managed IT operations supporting 1,500+ users across multiple sites
- Led and mentored a team of 10 IT professionals
- Managed IT budget exceeding ₹2 Crore annually
- Led recovery during major cybersecurity incident
- Strong expertise in GxP, CSV, Data Integrity & 21 CFR Part 11 compliance
- Experience in Azure cloud readiness and migration
- Multi-site manufacturing IT operations management
- Vendor, contract, and SLA governance
- ITIL-certified professional
- Disaster recovery and business continuity planning
- Regulatory audit and compliance management

PROFESSIONAL EXPERIENCE

SENIOR MANAGER – IT
MICROLABS LTD | April 2018 – Present

- Direct IT operations across multiple pharmaceutical manufacturing sites and warehouse locations, supporting a user base of 1,500+ employees.
- Administer and maintain enterprise-wide IT infrastructure covering servers, storage systems, virtualization layers, network architecture, cybersecurity solutions, and core business applications.
- Guide, supervise, and develop a team of 10 IT professionals distributed across locations to ensure smooth operations and consistent service quality.
- Control and optimize an annual IT budget of over ₹2 Crore, focusing on cost efficiency, resource planning, and effective utilization.
- Respond to and lead recovery efforts during cybersecurity incidents, ensuring rapid restoration of critical systems and minimal business disruption.
- Lead cloud modernization initiatives, including Azure readiness planning and migration of selected workloads to Microsoft Azure platform.
- Ensure adherence to regulatory frameworks such as GxP, Data Integrity standards, Computer System Validation (CSV), and 21 CFR Part 11 compliance.
- Design, document, and enforce IT policies, SOPs, governance structures, and validation processes aligned with audit and compliance requirements.
- Enhance organizational resilience through backup optimization, disaster recovery planning, and business continuity strategies.
- Coordinate with vendors, manage contracts, and oversee SLA performance to maintain service quality and operational reliability.
- Work closely with senior management and business stakeholders to align IT initiatives with organizational goals and priorities.
- Continuously assess and improve IT service delivery performance across infrastructure, systems, and support functions.

MANAGER – IT
ADCOCK INGRAM LIMITED | OCT 2016 – APR 2018

- Oversaw validated IT systems supporting pharmaceutical manufacturing and regulated production environments.
- Designed and implemented disaster recovery solutions leveraging storage replication technologies to ensure business continuity.
- Deployed and managed Veeam Backup & Replication for virtualized infrastructure, improving data protection and recovery efficiency.
- Maintained audit-ready IT environments by ensuring adherence to regulatory standards and internal compliance requirements.
- Provided IT support for manufacturing and laboratory systems while safeguarding data integrity, availability, and security.

SENIOR SYSTEMS ENGINEER
COMPASS IT SOLUTIONS (WEIR MINERALS INDIA PVT LTD – CONTRACT) | NOV 2014 – JUL 2016

- Managed VMware vSphere environment comprising 15 ESXi hosts and over 200 virtual machines supporting enterprise operations.
- Administered high availability (HA), distributed resource scheduling (DRS), vMotion, and performed capacity planning for optimal infrastructure performance.
- Monitored system performance, conducted infrastructure health checks, and implemented optimization measures to ensure stability and efficiency.
- Executed backup validation activities and supported compliance reporting requirements for audit readiness.
- Contributed to business continuity initiatives by ensuring reliable and resilient virtualized infrastructure operations.

IMS ENGINEER
FRONTIER BUSINESS SYSTEMS (IBM ASP) | APR 2007 – SEP 2011

- Administered VMware-based infrastructure environments along with backup operations and disaster recovery solutions.
- Coordinated infrastructure support services for multiple enterprise customers, ensuring consistent system availability.
- Supported implementation of high-availability and virtualization solutions to enhance infrastructure resilience.
- Participated in maintenance, monitoring, and optimization of IT systems across client environments.

L1 ENGINEER
ATSL (TVS GROUP) | AUG 2005 – APR 2007

- Provided first-level technical support for LAN, desktop systems, hardware issues, and end-user computing environments.
- Delivered on-site and remote IT support across multiple business locations to ensure smooth operations.
- Assisted in routine infrastructure maintenance, troubleshooting, and resolution of technical incidents.
- Supported IT teams in system setup, configuration, and basic network administration activities.

TECHNICAL EXPERTISE

- **Virtualization:** VMware ESXi, VMware vCenter, vSphere, vMotion, DRS, HA
- **Cloud Technologies:** Microsoft Azure (Cloud readiness and migration)
- **Operating Systems:** Windows Server 2012, 2016, 2019
- **Backup & Disaster Recovery:** Veeam Backup & Replication, Dell NetVault, CommVault Simpana
- **Network & Security:** Fortinet Firewall, Active Directory, DNS, DHCP, WSUS, IIS

DECLARATION

Hereby declared that the above particulars of facts and information stated are true, correct and complete to the best of the belief and knowledge.
