GOWTHAM M

Laravel Full Stack Developer | 1 Year 6 Months Experience

93606 70700 | gowthamguna46@gmail.com | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Laravel Full Stack Developer with 1 year 6 months of hands-on experience building scalable web applications using PHP, Laravel, MySQL, and REST APIs across Blade/jQuery and Vue.js frontends. Experienced in AI-integrated platforms, B2B e-commerce systems, and admin-panel tooling (DataTables, Excel/PDF exports). Passionate about delivering high-quality, user-focused digital products in a growth-driven team.

WORK EXPERIENCE

Laravel Developer — Cloudi5 Technologies

June 3, 2026 – Present

Coimbatore, Tamil Nadu

- Develop and maintain secure RESTful APIs and server-side features using PHP and Laravel.
- Build Blade-based frontend and admin panel UI using Bootstrap 5, jQuery, and Vite.
- Manage and optimize MySQL/SQLite databases, improving query performance for large datasets.
- Implement role-based access control (RBAC) and secure session-based authentication.

Project: RegulusBMS VAAB *(regulusvaab.com)*

Tech Stack: PHP 8.2+ · Laravel 11 · MySQL/SQLite · Blade · Bootstrap 5 · jQuery · Vite · Yajra DataTables · Maatwebsite Excel · mPDF

- Built a B2B e-commerce platform for industrial actuators, supporting multi-currency (INR, AED, EUR, QAR, USD) pricing and localization for international buyers.
- Developed a BOQ (Bill of Quantities) cart system enabling bulk product enquiry and formal quotation workflows for procurement clients.
- Implemented role-based registration/login for OEM, Admin, and Partner users with admin-approval workflows to control access.
- Used Yajra DataTables, Maatwebsite Excel, and mPDF to power admin listings, report exports, and quotation documents.
- Built brand/make-based product filtering (L&T, Bosch, Tata Motors, Hyundai, etc.) with wishlist and recently-viewed tracking.
- Added geolocation-based auto-detection of country and currency, with live BOQ recalculation on currency change.
- Developed dynamic 'Best Selling' and 'New Arrivals' catalog sections with real-time product/rating display.

Laravel Full Stack Developer — CodePixel Solutions Pvt. Ltd.

March 2025 – May 30, 2026

Namakkal, Tamil Nadu

- Designed and developed scalable web applications with secure RESTful APIs using PHP and Laravel.
- Built responsive frontend components using Vue.js, Tailwind CSS, and JavaScript (ES6+).
- Integrated third-party AI APIs and built custom API integration workflows for client projects.
- Used Git for version control and Docker for containerized deployment workflows.

Project: Pixalto *(pixalto.app)*

Tech Stack: PHP · Laravel · Vue.js · Tailwind CSS · REST API · AI Integration

- Developed an AI-powered image and video generation platform integrating external AI APIs with a Laravel backend.
- Implemented RBAC and secure session-based authentication, including a credit-based usage system.
- Designed a fully responsive, cross-browser UI using Vue.js and Tailwind CSS, enhancing mobile engagement.
- Built RESTful APIs powering tools including background removal, face swap, and AI image/video generation.
- Integrated a unified dashboard covering 20+ AI tools (upscaler, style transfer, avatar studio, logo generator, etc.) under one credit-based system.
- Implemented a free-credit signup flow (25 credits) with pricing/plan pages to drive trial-to-paid conversion.
- Added multi-language support (English, Spanish, French) and analytics tracking via Google Tag Manager.

TECHNICAL SKILLS

Frontend: HTML5, Blade, Bootstrap 5, Tailwind CSS, Vue.js, jQuery, JavaScript (ES6+), Vite, Axios

Backend: PHP 8.2+, Laravel 11, REST API Development, Yajra DataTables, Maatwebsite Excel, mPDF

Database: MySQL, SQLite (Query Optimization, Schema Design)

DevOps & Tools: Docker, Git, GitHub, PhpStorm, VS Code, Postman

EDUCATION

B.E. Mechanical Engineering — Kongunadu College of Engineering and Technology

2019 – 2023 | CGPA: 8.0 / 10
