Core Innovation&System Development

I have been joined (TCS) and started as an Information process enabler associate for the project named as Bank Of America (BOA) in rotational shifts and rotational week off too, because, I have to follow the US Calendar.

During my tenure at Tata Consultancy Services (TCS) in the BPO operations division, I specialized in medical bill processing utilizing AI-powered OCR engines. My primary responsibilities included managing the workflow of digitizing medical claims, As an associate, I have worked for a special team called as "JUMBO TEAM" which includes a specified working for important and sensitive groups of work and also validating key fields extracted by the OCR system—such as ICD/CPT codes, billing amounts, and provider details—and resolving data discrepancies. By auditing OCR exceptions and maintaining compliance with healthcare standards, I consistently achieved top-tier accuracy rates and contributed to streamlined claims processing cycles.

TCS EXTRACTION TOOL (TIDES)

I have also been worked as an Engine Tester for TCS TIDES (TCS intelligent digital extraction suite) which was built and currently developing by TCS, an enterprise-grade AI, machine learning, and OCR extraction platform actively built and enhanced in-house by TCS. My role centered on rigorously testing and validating the engine's core parsing capabilities, ensuring high-accuracy data capture from complex, structured, and unstructured documents. I routinely ran test scenarios, tracked model drift, flagged extraction mismatches, and collaborated closely with the technical product team to benchmark updates, refine learning algorithms, and enhance overall engine reliability.

Contributed to the development and enhancement of TCS TIDES (TCS Intelligent Digital Extraction Suite), enabling automated, end-to-end data extraction from structured and unstructured documents.

- Established strong relationships with key stakeholders, facilitating effective communication across departments and teams.
- Enhanced team productivity by streamlining communication and implementing efficient project management tools.

REWARDS AND CERTIFICATIONS

 Awarded TCS 'Star of the Month' (Gems) among team members for driving on-time delivery of critical client deliverables while maintaining 100% SLA compliance.

 Earned TCS Star Gems for taking complete ownership of complex project modules, optimizing execution efficiency.

 Received formal Client Appreciation for demonstrating agility in accommodating last-minute scope changes without impacting release dates.

 AI Spark&Xcelerate Warrior: Certified for active participation in AI capability development and high-velocity learning on TCS internal platforms.

 Idea Igniter: Recognized for contributing actionable innovation and process optimization ideas to project workflows.

 Feedback Enabler, Enthusiast&Influencer: Awarded for consistently promoting a collaborative feedback ecosystem and active peer recognition.

ACADEMIC QUALIFICATION:

- Bachelor Degree in Physics from AVS College of arts and science, Graduated in 2023 with 72% marks.

PROFESSIONAL SKILLS:

- Organizational Skills, Data Entry, Technical Skills, Database Management.

I am looking for opportunities where I can leverage my Organizational Skills which I have gained from my previous company.
