OBJECTIVE

Results-driven and detail-oriented aspiring Database Developer with strong knowledge of SQL, Python, Snowflake, Excel, and Power BI. Skilled in data analysis, data cleaning, query optimization, and data visualization with hands-on experience developing SQL-based analytical projects. Passionate about transforming raw data into meaningful business insights and eager to contribute analytical skills in a data-driven organization.

INTERNSHIP / TRAINING

Data Analytics Course Completed — Besant Technologies *March 2026 - Present*

- Completed a structured Data Analytics training program covering SQL, Python, Snowflake, and Power BI.
- Practiced writing SQL joins, views, stored procedures, and Snowflake queries to improve query performance and maintain data accuracy.
- Gained hands-on exposure to ETL processes, debugging SQL issues, database maintenance, and report generation.

TECHNICAL SKILLS

SQL: Joins, Subqueries, CTEs, Window Functions, Views, Stored Procedures, Aggregate Functions

Python: NumPy, Pandas, Matplotlib, Data Cleaning, Data Analysis

Snowflake: Data Warehousing, ETL, Star Schema, Snowflake Schema, Fact Tables, Dimension Tables

Power BI: DAX, Power Query, Data Modeling, Dashboards, KPI Reporting

Excel: Pivot Tables, XLOOKUP, VLOOKUP, Conditional Formatting, Charts, Data Validation

Databases: MySQL, Snowflake

Version Control: Git, GitHub

PROJECTS

Banking Management Data Warehouse

- Designed a Banking Management Data Warehouse using Snowflake following Star Schema architecture.
- Created Fact and Dimension tables including Customer, Branch, Location, Transaction Type, Channel, Date, and Transaction using dimensional modeling.
- Developed advanced SQL queries using Joins, CTEs, Window Functions, Views, and Aggregate Functions for banking analytics.
- Generated reports on customer details, transaction type, maximum loan amount, pending loans, and branch performance.

Power BI Sales Analytics Dashboard

- Built an interactive Power BI dashboard to track sales performance, revenue trends, and regional distribution using data imported from Excel and SQL sources.
- Designed data models and relationships using Power Query and applied DAX measures to calculate KPIs such as Total Sales, Profit Margin, and Year-over-Year Growth.
- Created visualizations including trend charts, regional maps, and KPI cards to enable data-driven decision-making for stakeholders.
- Implemented slicers and drill-through filters to allow dynamic analysis by product category, region, and time period.

EDUCATION

Bachelor of Engineering, Computer Science and Engineering

SSM College of Engineering | 2022 - 2026
