MOHAMED ABUPAKKAR SIDDIQE S

FULL-STACK SOFTWARE DEVELOPER | AI & SaaS ENGINEER

Coimbatore, India | +91 6383306866 | siddiqesq2004@gmail.com

LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full-Stack Software Developer with hands-on experience building and deploying production SaaS, AI-powered applications, REST APIs, and data-driven systems. Shipped 6 production platforms across education, recruitment, research, and conference management. Experienced with React, Next.js, Node.js, Laravel, PHP, Python, MySQL, AWS, LLM integration, AI agents, multi-tenant SaaS architecture, and API-driven development.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, PHP, Java, C, C++
- **Frontend:** React, Next.js, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Laravel, REST APIs, Authentication, Role-Based Access Control
- **Databases:** MySQL, SQL, Multi-Tenant Database Design, Query Optimization
- **AI & Automation:** LLM Development, AI Agents, Agentic AI, Prompt Engineering, LLM APIs, n8n
- **Cloud & SaaS:** AWS, Multi-Tenant SaaS, Cloud Applications, Deployment, MVP Development
- **Data:** Python, Pandas, NumPy, ETL/Data Pipelines, Tableau, EDA
- **Tools:** Git, GitHub, VS Code, PyCharm, Arduino

PROFESSIONAL EXPERIENCE

Software Developer | RadInfo Tech | Nov 2025 – Present

- Designed, developed, and deployed **6 production SaaS and AI-powered platforms** serving real users across education, recruitment, and research.
- Built a multi-tenant School ERP with tenant isolation, subscription management, and role-based access control for administrators, teachers, and students.
- Developed LMS and examination systems for online course delivery, student progress tracking, and placement-training assessments.
- Engineered AI products including NeuroHire, an AI recruitment platform, and an Interview AI Agent for resume parsing, job matching, and simulated interviews.
- Developed Research Copilot, an LLM-powered application supporting structured academic manuscript creation, citation workflows, and formatting.
- Integrated third-party APIs, payment gateways, data pipelines, and REST services across production platforms with scalable application architecture.

Data Science & Analyst Intern | ZIDIO Development | Aug 2025 – Nov 2025

- Applied Python and industry-standard data science tools to solve real-world problem statements.
- Performed data preprocessing, exploratory data analysis, and predictive machine learning modeling to generate actionable insights.

Software & Data Intern | SakthiLishanth Solar | Jun 2025

- Applied solar monitoring techniques, data analysis workflows, and web development practices to improve internal data visibility.

Data Analyst Intern | Unified Mentor Pvt. Ltd | Mar 2024 – Jun 2024

- Performed end-to-end data analysis using Python and Tableau and built interactive dashboards.
- Delivered analytical insights to support business decision-making.

Data Scientist Training | Internshala | Dec 2022 – Jan 2023

- Completed structured training in Python for data science, including data manipulation, visualization, and predictive modeling.

PROJECTS

School ERP – Multi-Tenant SaaS Platform

Architected a cloud-based SaaS ERP for schools with multi-tenant subscription management, tenant isolation, and role-based access control for administrators, teachers, and students.

NeuroHire – AI Recruitment SaaS Platform

End-to-end AI hiring platform: companies post jobs; AI assesses candidates via conversational interviews, evaluating fluency, technical answers, and behavioral fit to filter suitable applicants automatically.

LMS Platform – Online Learning & Exam System

Full LMS supporting course delivery, student progress tracking, and live exam/assessment modules for placement training cohorts.

Interview AI Agent – Resume-to-Job Matching & Mock Interviews

AI agent that parses candidate resumes, matches profiles to relevant job listings, and conducts interactive AI-simulated mock interview sessions with real-time feedback.

Research Copilot – AI Manuscript Assistant

LLM-powered research tool guiding new researchers through structured academic manuscript creation, citations, and formatting workflows.

Conference Management SaaS Site

Full-featured conference portal where admins post events and attendees register, pay, and manage participation — with integrated payment gateway and dashboard.

Agentic AI Email Automation (n8n)

Built an Agentic AI system integrated with a chatbot that automatically generates and sends professionally worded e-commerce email responses via the n8n automation platform.

AI-Driven Autonomous Vehicle Simulation Software

Engineered an AI-driven simulation platform recreating realistic driving environments, sensor inputs, and intelligent agent behaviors to accelerate AV development, testing, and safety validation.

Product Website Development (Amazon Clone)

Developed a full-stack e-commerce website replicating Amazon's core functionality: product listings, search, filtering, and a responsive UI with strong focus on UI/UX design and database management.

Voice Controlled Robot Using Arduino

Designed and built a voice-controlled robot that processes audio input via speech recognition to enable hands-free, command-driven movement — winner of Project Expo First Prize, SNSCT.

Vision Bot – Hand Gesture Controlled Robot

Developed a hand gesture-controlled robot using sensor-based movement interpretation, integrating embedded systems and wireless communication for real-time seamless control.

Line Follower Robot with Obstacle Detection

Built an autonomous line-following robot with obstacle detection to assist differently-abled individuals in safe and efficient navigation.

EDUCATION

B.E. Mechatronics Engineering | SNS College of Technology | 2022 – 2026 | CGPA: 8.7 / 10

HSC (Class XII) | National Public School, Namakkal | 80%

SSLC (Class X) | National Public School, Namakkal | 75%

CERTIFICATIONS

- AWS – Generative AI & Cloud Computing
- Full Stack Development Certification
- Python – Programming Certification
- C – Programming Certification
- SQL – Database Certification
- C++ and 7+ MOOC Courses
- NPTEL – Rapid Manufacturing (72%)

NOTABLE ACHIEVEMENTS

- Project Expo – **First Prize**, Voice Controlled Robot, SNSCT
- Vision Bot – **First Prize**, DSCE Competition

ACTIVITIES

- Smart India Hackathon 2024 – Participant
- Unstop Ideathon – AI & ML (2023)
- Unstop Code Golf – IIT Jodhpur (2025)
- Workshop: Vision Bot – NIT Trichy (2023)

LANGUAGES

English (Fluent) | Tamil (Native) | Hindi (Spoken) | Japanese (Basic)
