CAREER OBJECTIVE

To obtain a challenging position in a reputed organization where I can utilize my technical knowledge, problem-solving abilities, and communication skills while continuously learning and contributing to organizational growth.

TECHNICAL SKILLS

Languages: C#, python(basic level)

PROFESSIONAL EXPERIENCE

MOBASE Electronics | Production Associate
December 2025 – May 2026 (6 Months)

- Worked in electronics manufacturing and production operations.
- Performed assembly and inspection of electronic components.
- Maintained quality standards and production targets.
- Collaborated with team members to ensure efficient workflow.
- Followed safety and quality procedures in the production environment.

TVS Sundaram Motors | Intern
1 Month Internship

- Gained exposure to industrial operations and maintenance processes.
- Observed quality control and workflow management practices.

PROJECT EXPERIENCE

Smart Energy Meter with Automatic Billing and Load Monitoring

- Developed a smart energy meter system to monitor electricity consumption in real time.
- Automated the billing process based on energy usage.
- Implemented load monitoring to improve energy efficiency and prevent overload conditions.
- Technologies Used: Embedded Systems, Sensors, Microcontroller.

Rain Detector System

- Designed a rain detection system capable of sensing rainfall automatically.
- Triggered alerts based on weather conditions.
- Improved automation and environmental monitoring capabilities.

Automatic Gas Booking System

- Developed an automated gas booking system using sensor technology.
- Monitored gas cylinder levels and generated booking requests automatically when the gas level was low.
- Enhanced user convenience and ensured uninterrupted gas supply.

EDUCATION

B.E. in Electronics and Communication Engineering (ECE)
Sri Shanmugha College of Engineering and Technology Tamilnadu(2026)

CERTIFICATES

- **IEEE Conference Participation Certificate** – Participated in an IEEE Conference and presented technical knowledge and project insights.
- **International Conference Participation Certificate** – Attended an International Conference and gained exposure to emerging technologies, research trends, and technical advancements.
- **Embedded Systems Training Certificate** – Completed training in embedded systems, microcontrollers, sensors, and automation concepts.
- **Effective Leadership Certificate** – Developed leadership, teamwork, communication, and decision-making skills.
- **Digital Thinking Certificate** – Gained knowledge in digital innovation, problem-solving, and modern technology trends.
- **Participated in Multiple Technical Symposiums, Project Presentation Events, and Skill Development Workshops.**

DECLARATION

I hereby declare that all the information furnished above is true and accurate to the best of my knowledge.
