ANU ELUMALAI

anuealumalai5@gmail.com 9965639945 Salem,Tamilnadu

PROFILE

Motivated M.Sc Microbiology graduate with strong knowledge in microbiological techniques and laboratory practices. Experienced in microbial culture, staining methods, and basic molecular biology techniques. Interested in research and applications in microbiology, food science, and biotechnology.

EDUCATION

HSC - Mark -75% 2017 – 2019
Government Girls Higher Secondary School

SSLC - PURE SCIENCE Mark -82% 2019 – 2021
government Girls Higher Secondary School

BACHELOR OF SCIENCE- MICROBIOLOGY (Mark-75%) 2021 – 2023
Periyar University

MASTER OF SCIENCE-MICROBIOLOGY (Mark-83%) 2024 – 2026
Periyar University

SKILLS

EXPERIENCE IN LABORATORY

- Microbial Culture and Isolation Techniques
- Aseptic Laboratory Techniques
- Microscopy and Microbial Identification
- Biochemical and Enzymatic Assays
- Spectrophotometric Analysis (UV–Vis)
- Basic Molecular Biology Techniques
- Data Analysis and Scientific Documentation

COMPUTER SKILLS

- MS Excel
- MS Word
- Data entry

LANGUAGES

TAMIL ●●●●● ENGLISH ●●●○○

PROJECTS

development and evaluation of biodegaradable food packaging film using pigment from "halymania venusta: 09/2025 – 06/2026
Marine algae

- To extract and purify pigments from Halymenia venusta using chromatographic techniques.
- To characterize the structural and functional properties of the isolated pigments using analytical methods.
- To evaluate the antimicrobial activity of pigment extracts and pigment-incorporated biodegradable films.
- To assess the potential of pigments as pH-sensitive bio-colorants for intelligent food packaging.

INTERESTS

Microbiology — Microbiology Research • Marine biology • Food safety and Quality • Medical Coding • Molecular Biology • Industrial Microbiology

INTERNSHIPS

Medical laboratory Intern 05/2020 – 06/2020
Clinical laboratory training Salem,Tamilnadu
Assisted in routine laboratory procedures, including sample collection and microbial analysis. gained practical experience in microscopy, staining techniques, and basic diagnostic tests. Followed laboratory safety procedures and maintained accurate data records.

Research intern 05/2025 – 06/2025
Molecular Biology about Fisheries Kochi , Kerala
- To learn basic techniques used in molecular biology.
- To understand DNA extraction and analysis in fish species.
- To study genetic identification of different fish species.
- To improve practical skills related to fisheries science.
- To understand the role of genetics in fish breeding and conservation.

PRESENTATION

ORAL PRESENTATION—
- Towards a Healthier India: Harnessing Scientific Innovations for Antimicrobial Resistance and Stewardship (THAMIRS 2025) November 20-21, 2025
- Marine Microbiome and Human Health: Nutraceuticals and Probiotics from the Ocean. (Sep 2025)

POSTER PRESENTATION—Emerging Opportunities and Challenges in Management of Aquaculture and Agriculture Productivity and Economic Resilience (EOCMAA-2024) & ICAR Marine Bioresource Conservation and Sustainable Utilization of Marine-Based Products (MBCSUM-2024)

PPT PRESENTATION - 3-Day National Seminar on **Waste Management and Sustainable Practices,** organized by ATAL VAANI - AICTE in collaboration with Kalinga University, Naya Raipur.

CERTIFICATES

- Food safety level 1 (ISO 22000:2018)
- HACCP level 2
- Industrial guidelines for microbiological examination
