Summar y

Software Developer with hands-on experience building full-stack applications and production-level solutions. Strong foundation in Java, software development, APIs, databases, and problem solving, with practical experience in backend and frontend development and exposure to cloud technologies.

Technical Skills

Programming Languages: Java, JavaScript, TypeScript
Backend & APIs: Java, Spring Boot, Node.js, Express.js, REST APIs, Fast API.
Frontend: React.js, Bootstrap, HTML, CSS,Tailwind CSS
Databases: MySQL, MongoDB, Spring Data JPA/Hibernate
Software Engineering: OOP, Data Structures & Algorithms, JWT Authentication, API Integration
Tools:Git, GitHub, VS Code, Postman,VS code, Vercel, Netlify, Railways etc..

Experience

Full Stack Developer Intern

Adz4needz *JUN 2026 – Ongoing*

- Developed and maintained responsive React.js applications integrated with Node.js/Express.js and Python FastAPI backends in a collaborative development environment.
- Built reusable UI components and integrated RESTful APIs to deliver dynamic, production-ready frontend features.
- Used Git/GitHub for version control across development and deployment.
- Debugged frontend, backend, database, and API issues, including CORS, environment configuration, and build failures, to improve application stability and performance.

Projects

Eshop – Multi-Vendor Ecommerce platform **Github**

- Built a multi-vendor e-commerce platform connecting multiple sellers with customers through an online platform.
- Developed backend services using Java and Spring Boot with REST APIs for product, order, vendor, and user management.
- IImplemented JWT authentication and role-based access for customers, vendors, and administrators.
- Developed product management, cart and order processing, vendor operations, and real-time order notifications.
- Tech Stack: Java | Spring Boot | React | MySQL | REST API

GEO-Intel – AI-Powered Geospatial Business Intelligence Platform **Github**

- Developed an AI-powered platform to identify the best locations for business expansion.
- Implemented location-based analytics, demand analysis, and competitor mapping features.
- Built backend services using Python and FastAPI with PostgreSQL for application data.
- Enabled data-driven business decisions through location insights and feasibility analysis.
- Tech Stack: Next.js | Python | FastAPI | PostgreSQL | OpenStreetMap | Apify | XGBoost

QP GEN AI **Github**

- Built an AI-powered platform for generating university-standard question papers from syllabus content.
- Implemented Bloom's Taxonomy-based question generation and difficulty-based question selection.
- Developed backend services using Spring Boot and REST APIs for question paper generation.
- Integrated Gemini AI for intelligent question generation and iText for automated PDF formatting.
- Tech Stack: React.js | Java | Spring Boot | MongoDB | Gemini AI | iText

Educa tion

B.Tech – Information Technology *2022-2026*
Sri Shakthi Institute of EngineeringandTechnology,Coimbatore *CGPA:7.2**
