CIBERAJ V G

26, Old Maar Amman Street, V.N. Palayam, Sankari (637301), Salem, Tamil Nadu
Phone: 9842717410 | Email: ciberaj68@gmail.com

OBJECTIVE

Motivated B.Sc Information Technology graduate seeking an entry-level role in Embedded Systems / IoT with a strong foundation in microcontroller programming, communication protocols (UART, I2C, SPI), and sensor-based automation, complemented by hands-on skills in cyber security, networking, and web development.

EDUCATION

B.Sc Information Technology — Hindustan College of Arts and Science
2023 – 2026 | CGPA: 7.8

TECHNICAL SKILLS

Embedded Systems & IoT: Microcontroller Programming (ESP32, NodeMCU, Arduino), Communication Protocols: UART, I2C, SPI, RS232, RS485, Modbus, Sensor Interfacing (Ultrasonic, Motion), RTOS & Firmware Basics, Embedded C

Hardware & PCB: PCB Designing, Schematic Design, PCB Assembly, PCB Testing, THT & SMD Soldering, Circuit Testing & Debugging, Dual Amplifier Circuits

Security Tools: Kali Linux, Wireshark, Nmap, Burp Suite, Metasploit, John the Ripper

Security Domains: Ethical Hacking, Vulnerability Assessment & Penetration Testing (VAPT), Network Security, Threat Identification, OWASP Top 10 Fundamentals

Operating Systems: Windows OS, Linux OS (Kali, Ubuntu)

Networking: TCP/IP, LAN/WAN Concepts, Firewalls, Packet Analysis

Programming: C, Embedded C, Python (basics), HTML/CSS/JavaScript (Web Development)

SOFT SKILLS

Problem Solving, Analytical Thinking, Quick Learner, Team Collaboration, Communication, Attention to Detail

LANGUAGES

Tamil, English

INTERNSHIP EXPERIENCE

Embedded Systems / IoT & Medical Device Intern — Korak Space India Pvt Ltd
April 27, 2026 – Present

- Worked on IoT-based current sensing for medical device applications
- Designed and tested dual amplifier circuits used in medical device development
- Gained hands-on exposure to embedded hardware design and signal conditioning for medical electronics
- Learned PCB designing and schematic design for embedded/medical device circuits
- Performed PCB assembly and PCB testing for embedded hardware modules
- THT (Through-Hole Technology) and SMD (Surface-Mount Device) soldering techniques
- Worked with communication protocols including UART, I2C, SPI, RS232, RS485, and Modbus for device interfacing

Cyber Security Intern — Qtree Technologies

- Learned and practiced ethical hacking techniques using Kali Linux
- Performed vulnerability assessment and security testing on sample systems
- Assisted in network analysis and threat identification

Web Development Intern — ATS Pvt Ltd

- Developed web applications using frontend and backend technologies

- Improved UI/UX design and application responsiveness

Web Development Intern — Sun Enterprises

- Designed user-friendly interfaces for web applications
- Assisted in backend integration and debugging

PROJECTS

IoT Device for Current Sensing in Medical Devices

- Developed a current sensing system supporting multiple operating modes for medical device applications
- Interfaced sensors and modules using UART, I2C, and SPI protocols for local communication between microcontroller and peripherals
- Used Modbus protocol for standardized data exchange and integration with industrial/medical monitoring systems
- Designed dual amplifier circuitry for accurate signal conditioning of current sensing data

Smart IoT-Based Garbage Monitoring System

- Developed an IoT-based monitoring system using ESP32/NodeMCU and ultrasonic sensors
- Built a real-time dashboard displaying bin status (Empty/Half/Full)
- Implemented alerts via LED, buzzer, and mobile notifications

Smart Home Automation System

- Built a smart home automation system using ESP32 and ultrasonic sensors
- Implemented motion-based automation for lighting and door control
- Enabled Wi-Fi based remote monitoring and control
- Optimized energy usage through automatic ON/OFF logic
