PROFESSIONAL SUMMARY

Final-year Electronics and Communication Engineering student with foundational knowledge in **VLSI Design, Digital Electronics, RTL Design, Verilog HDL, CMOS fundamentals, and semiconductor systems**. Hands-on exposure through internships in the **automotive hardware, sensors and communication, and AI domains**. Interested in developing reliable digital hardware systems and pursuing opportunities in **VLSI Design, RTL Design, ASIC/FPGA, and semiconductor engineering**.

TECHNICAL SKILLS

VLSI & Digital Design : VLSI Design Fundamentals, Digital Logic Design, RTL Design, Combinational and Sequential Logic, FSM, CMOS Fundamentals

HDL & Programming : Verilog HDL, C, Python

Semiconductor Fundamentals : Digital Electronics, Semiconductor Devices, CMOS Logic, Basic Computer Architecture

Hardware & Embedded : Sensors, Communication Systems, Microcontroller Fundamentals, Hardware Interfacing

Tools : MobaXterm, Git, GitHub, Linux/Terminal Environment

PROJECTS

Development of Small-Scale, Cost-Effective and Sustainable Plastic Waste Disposal System

- Developed a **small-scale plastic waste disposal system** with emphasis on cost-effectiveness, sustainability, and practical waste-management applications.
- Designed the system with a focus on improving the handling and disposal of plastic waste while considering resource efficiency and environmental impact.
- Used **MobaXterm** as part of the development and system interaction environment for project implementation and testing.

EXPERIENCE

Versigent June 11, 2026 – July 11, 2026
Hardware Intern – Automotive Industry Chennai, India

- Completed a one-month onsite internship with exposure to **hardware systems and automotive industry applications**.
- Gained practical exposure to hardware development workflows, electronic systems, and engineering practices used in automotive applications.
- Participated in technical activities and industry-oriented learning related to automotive hardware systems.

EnthuTech 2 Weeks
Intern – Sensors and Communication Technology Coimbatore, India

- Completed an onsite internship focused on **sensors and communication technologies** and their practical applications.

- Gained exposure to sensor-based systems, electronic interfacing, and communication concepts through hands-on technical activities.
- Participated in practical learning activities involving electronic systems and sensor-driven applications.

Data Patterns 1 Month
AI Domain Intern Coimbatore, India

- Completed a one-month onsite internship with exposure to **Artificial Intelligence** concepts and industry-oriented applications.
- Gained practical understanding of AI-based technologies and their application in engineering problem-solving.
- Participated in technical activities and gained exposure to professional engineering workflows.

EDUCATION

Bachelor of Engineering in Electronics and Communication Engineering Expected 2027
Final-Year ECE Student | CGPA: 7.45/10 India

Eklavya Model Residential Higher Secondary School
Higher Secondary Certificate (HSC) | Percentage: 68% India

Eklavya Model Residential School
Secondary School Leaving Certificate (SSLC) | Percentage: 100% India

ACHIEVEMENTS

- Successfully completed and participated in the **EnthuTech Internship** focused on sensors and communication technology.
- Successfully completed and participated in the **Versigent Hardware Internship** in the automotive industry.
- Successfully completed and participated in the **Data Patterns Internship** with exposure to Artificial Intelligence applications.
- Participated in the **PSG IoT Workshop**, gaining exposure to Internet of Things concepts and applications.
