Career Objective

B.Tech Artificial Intelligence and Data Science student with hands-on experience in Python, Machine Learning, SQL, and AI-based application development. Experienced in developing data-driven solutions, database systems, and ML applications through academic projects and internships. Strong interest in Data Science, Machine Learning, and Software Development, with a focus on solving real-world problems using technology.

Education

2022-2023 : Higher Secondary Education, Percentage: 83%

2023-2027 : B.Tech Artificial Intelligence And Data Science, CGPA: 8.35

Technical Skills

- **Programming Languages:** Python, Java
- **Web Development:** HTML, CSS, JavaScript
- **Database:** Mysql, PostgreSQL
- **Tools:** GitHub, VS Code, PowerBI, Figma
- **Soft Skills:** Communication Skills, Adaptability.

Certification

- NVIDIA – Fundamentals of Deep Learning
- NPTEL – Cloud Computing
- NPTEL – Introduction to Internet of Things
- VACC – Machine Learning with AI Applications
- VACC – Core Java

Language Known

- Tamil (Native)
- English (Proficient)
- Chinese (Basic)

Projects

- **Weather-Aware Crop Recommendation System** -Python, Machine Learning, Data Analysis, Weather Data Integration
  Developed a machine learning-based crop recommendation system that suggests suitable crops using weather and environmental factors. Applied data analysis techniques to support data-driven agricultural decision-making and improve crop selection. **2023**
- **FloatChat – AI-Powered Conversational System for Ocean Data Discovery** - Python, PostgreSQL, Flask, React.js,Plotly
  Developed an AI-powered conversational system for exploring ARGO ocean datasets using natural language queries. Worked on database design, data preprocessing, and structured data storage for efficient retrieval, analysis, and visualization of oceanographic information. **SIH-2025**
- **AI-Powered Placement Readiness Prediction System** - Python, Flask, Pandas, NumPy, PostgreSQL, HTML, CSS, JS
  Developed an ML-based placement prediction system using classification algorithms, improving student skill analysis through automated recommendations based on academic performance, skills, and assessment results. Integrated interactive dashboards with analytics to help students identify improvement areas and track their progress

Internship

Web Development Intern – ONEYES
Designed and developed responsive web pages using HTML and CSS
Worked on frontend layout design **(1 Month)**

Web Development Intern – Next Future Technology
Assisted in developing and modifying website components Followed industry-level coding standards and documentation practices Collaborated with team members on web-based projects **(15 Days)**

Gen AI Intern – FFUTUREWISE
Explored Generative AI workflows, prompt engineering concepts, and practical AI application development. **(15 Days)**
