PROFESSIONAL SUMMARY

Mechanical Engineering undergraduate (B.E., 2027; CGPA 7.79/10) with hands-on experience in 3D CAD modelling, assembly design, and engineering drafting using NX CAD, SolidWorks, and AutoCAD. Completed reverse engineering, prototype development, and testing and validation projects, plus an automotive manufacturing internship at Grupo Antolin India. Seeking a Graduate Engineer Trainee / Mechanical Design Engineer / CAD Engineer role to apply CAD, GD&T, and design-for-manufacturability skills in product development.

TECHNICAL SKILLS

CAD & Design: NX CAD, SolidWorks, AutoCAD, 3D Part & Assembly Modelling, Engineering Drawing, Drafting, Reverse Engineering
Mechanical Engineering: Product Development, Design Optimization, Design for Manufacturability, Manufacturing Processes, GD&T (Basics), Quality Control
Analysis & Testing: Dimensional Measurement, Design Analysis, Prototype Testing & Validation
Tools & Programming: Python (Intermediate), C (Basic), Microsoft Excel, Microsoft Office

INTERNSHIP EXPERIENCE

Intern, Grupo Antolin India Pvt. Ltd. *Jul 2026*
- Studied production rules, assembly procedures, and quality standards for automotive windshield sun shade manufacturing.
- Gained practical exposure to shop-floor operations and production workflow while supporting team project objectives.

Virtual Python Programming Intern, CODSOFT *Apr 2026*
- Developed Python-based applications and automation solutions for assigned technical tasks.

Machine Learning Intern, TechVolt Software Pvt. Ltd. *Jan 2025*
- Completed hands-on Python training covering data preprocessing, feature preparation, and basic model development through mini-projects.

ACADEMIC PROJECTS

Bicycle Reverse Engineering
- Reverse-engineered a bicycle through disassembly, dimensional measurement, and component analysis, then built 3D CAD models of its components.
- Identified opportunities for weight reduction, manufacturability improvement, and overall product optimization.

Medicine Delivery Drone
- Designed and assembled an X-type quadcopter prototype for lightweight medicine-package transport.
- Integrated propulsion, flight-control, radio-control, and payload-release systems; validated through pre-flight checks and flight testing.

Wearable Health and Fitness Alert System (Prototype)
- Designed a multi-sensor prototype (ESP32, MAX30102, MPU6050) with ergonomic housing and optimized sensor placement.
- Performed prototype testing, system validation, and cost analysis to assess design performance.

Embedded Blood Glucose Measurement System (Prototype)
- Built a prototype covering signal acquisition, signal conditioning, microcontroller processing, and real-time display; calibrated, tested, and debugged hardware to improve system stability.

EDUCATION

B.E. Mechanical Engineering, Knowledge Institute of Technology (KIOT), Salem *2023 - Present*
CGPA: 7.79 / 10 (up to 6th semester)

Higher Secondary Education (Class XII), Municipal Boys Higher Secondary School, Salem *2022 - 2023*
Score: 65.5%

Secondary School Education (Class X), Municipal Boys Higher Secondary School, Salem *2020 - 2021*
Score: All Pass

CERTIFICATIONS

- SolidWorks Foundations: Sketching & Extrusion, Dassault Systemes (Coursera)
- Product Design and Manufacturing, NPTEL
- Advanced Machining Processes, NPTEL

LEADERSHIP & ACTIVITIES

Class Representative | NSS Volunteer | Recognized for Project Contribution

AREA OF INTEREST

Medical Device Design | CAD Modelling | Reverse Engineering
