TECHNICAL SKILLS

Programming
• Java • Python • SQL

Frontend
• React.js

Backend
• Node.js • Express.js

Database
• MySQL

Data Analytics
• Power BI • Tableau

TOOLS & PLATFORMS

Git, GitHub, VS Code

EDUCATION

B.Tech - Artificial Intelligence & Data Science
Nandha Engineering College
2023 - 2027
CGPA: 8.5+

SCHOOLING

Appu Arivaalayem
(CBSE - Secondary School)
Class X | Percentage: 74%

Appu Arivaalayem
(CBSE - Secondary School)
Class XII | Percentage: 75%

LEADERSHIP

Department Secretary 2026-27
AI & DS Association

Department Joint Treasurer 2025-26
AI & DS Association

LANGUAGES

English | Tamil

CERTIFICATIONS

NPTEL – Cloud Computing | Elite
NPTEL, 2026

PROFESSIONAL SUMMARY

AI & Data Science undergraduate with hands-on experience in Python, SQL, Java, Artificial Intelligence and Data Analytics. Built academic and real-world projects focused on event management, AI-based image classification and data analysis. Experienced in data preprocessing, visualization and analytical problem-solving through internships and projects. Strong leadership experience through student activities, technical events and hackathons.

PROFESSIONAL EXPERIENCE

AI & Machine Learning Intern Dec 2025 - Jan 2026 (14 Days)
Appin Technology, Coimbatore
• Explored Artificial Intelligence and Machine Learning concepts through practical assignments and guided projects.
• Applied Python for data preprocessing and introductory AI model development.
• Strengthened analytical thinking through real-world AI use cases.

Data Science Intern Jun 2025 - Jul 2025 (14 Days)
Training Trains
• Performed data preprocessing and cleaning on structured datasets.
• Built analytical workflows using Python and data visualization techniques.
• Assisted in web scraping and data collection for business analysis.

FEATURED PROJECTS

PlanOra - Campus Event Management Platform
• Developed a campus event management platform to simplify event organization and attendance tracking.
• Implemented QR-based attendance, certificate generation and centralized event management workflows.
• Designed role-based dashboards for students, faculty and administrators.

AI-Based Plant Disease Detection
• Developed an image-based plant disease detection application using a pretrained deep learning model.
• Applied image preprocessing and Python-based inference to classify plant disease images.
• Explored AI applications for smart agriculture and automated disease identification.

Faculty Analytics Dashboard
• Built a faculty dashboard to analyze student performance and academic progress.
• Developed modules for uploading notes, assignments and question papers.

ACHIEVEMENTS

- Developed and deployed a personal portfolio website with a custom .me domain.
- Completed two industry internships in AI and Data Science.
- Organized a 24-hour departmental hackathon as Technical Event Coordinator.
- Built multiple AI and Data Analytics projects addressing practical problems.
- Actively solve coding problems on LeetCode and maintain GitHub repositories.
