PRAGATHEESWARAN N

Mechanical Engineering

9342834690 | pragu03042006@gmail.com | Government College of Engineering, Salem–11

CAREER OBJECTIVE

Final-year Mechanical Engineering student with practical exposure to manufacturing, quality inspection, NDT, metrology, and engineering design. Trained in NDT Level II methods including UT, VT, PT, MT, RT and RFI, with knowledge of quality control, GD&T, manufacturing processes, and dimensional inspection. Seeking a Graduate Engineer Trainee opportunity to contribute to production and quality operations while developing strong industrial expertise.

EDUCATION

B.E. Mechanical Engineering *Final Year — Graduation: 2027*

Government College of Engineering, Salem–11

TECHNICAL SKILLS

Manufacturing & Production: Manufacturing processes, production operations, process monitoring, waste reduction

Quality: Quality Control, Quality Assurance, inspection, non-conformance identification

NDT: Level II – UT, VT, PT, MT, RT & RFI

Metrology: Dimensional measurement, inspection techniques, measuring instruments

Engineering Drawing: GD&T, engineering drawing interpretation

CAD: SolidWorks, CATIA

Continuous Improvement: 5S, Kaizen, Lean Manufacturing – basic understanding

Problem Solving: Troubleshooting, analytical thinking, process improvement

INDUSTRIAL EXPOSURE / INTERNSHIP

Erode Electric Loco Shed *Industrial Internship*

- Gained exposure to railway locomotive maintenance and engineering practices.
- Observed inspection, maintenance, equipment handling, and safety procedures in an industrial environment.

NLC India Limited – Mining Mini Auto Section *Industrial Internship*

- Gained exposure to mining-related equipment and industrial operations.
- Observed maintenance, inspection, and operational practices in a heavy industrial environment.

ACADEMIC PROJECT

Thermal Management in Drone's ESC

- Studied thermal generation and heat dissipation in an Electronic Speed Controller (ESC).
- Investigated thermal management approaches to improve ESC operating reliability.
- Applied mechanical engineering concepts related to heat transfer and thermal management.

CORE STRENGTHS

- Analytical and problem-solving ability
- Quality-conscious approach
- Quick learner and adaptable
- Teamwork and communication
- Willingness to work in manufacturing environments and rotational shifts
- Willingness to relocate anywhere in India
