# SHANGAVAI P A

Tamilnadu, India | shangavai01021996@gmail.com | +91 8056510083 | GitHub Portfolio | LinkedIn

## PROFESSIONAL SUMMARY

Artificial Intelligence Analyst with hands-on expertise in Python, Scikit-Learn, SQL, and data analytics, skilled in AI asset deployment, predictive modeling, and customer segmentation. Experienced in EDA, fraud detection, clustering, and backend services, with a strong foundation in problem-solving, innovation, and delivering actionable insights to meet dynamic market demands.

## EDUCATION

**Bachelor of Electronics & Communication Engineering** 2013 - 2017

KSR Institute for Engineering & Technology, Tiruchengode - Namakkal. CGPA - 6.9/10

## PROJECTS

**Classification Projects | Credit Card Fraud Detection** | *Scikit-Learn, NumPy, Pandas*

- Developed and optimized supervised ML classification models (**Logistic Regression, Random Forest, XGBoost**) with full workflow from raw data ingestion to evaluation, applying data cleaning, feature scaling, and categorical encoding on imbalanced datasets.
- Performed model evaluation and tuning using Precision, Recall, F1-Score, and ROC-AUC metrics to maximize fraud detection accuracy and strengthen predictive performance.

**Regression Projects** | **Seoul Bike Rental** | *Pandas, NumPy, Matplotlib, Scikit-Learn*

- Engineered end-to-end predictive modeling pipelines on 8,700+ temporal/weather records to forecast continuous targets using regression workflows.
- Applied feature engineering and optimization (**LabelEncoder, StandardScaler**) with Linear Regression, $r^2$ score, MSE, and scatter visualizations to evaluate model performance.

**Clustering Projects** | **Bank Customer Segmentation** | *Python, Pandas, PCA, KMeans, Seaborn*

- Processed 1M+ bank transaction records with data imputation and feature scaling to build a high-dimensional unsupervised customer segmentation pipeline.
- Applied PCA (83%+ variance) and **KMeans clustering** (k-means++ with elbow analysis)

## TECHNICAL SKILLS

- **Data Analysis & Processing:** EDA, Data Cleaning, Predictive Modeling, Feature Scaling
- **Machine Learning :** Supervised, Unsupervised, Clustering, KNN, PCA
- **Languages & Libraries :** Python (Pandas, NumPy, Scikit-Learn)
- **Tools:** SQL, Excel, Google Workspace (Docs, Sheets, Slides, Gmail)
- **Core Competencies:** Problem-Solving, Quantitative Analysis, Critical Thinking.
- **Data Visualizations :** Power BI, Tableau (Basics), Matplotlib, Seaborn

## CERTIFICATIONS

**Deloitte Australia Data Analytics Job Simulation on Forage - August 6, 2026**

- Completed a **Deloitte job simulation** involving data analysis and forensic technology
- Created a data dashboard using **Tableau**
- Used **Excel** to classify data and draw business conclusions
