Professional Summary

To secure a challenging position as a software developer where I can utilize my programming skills, problem-solving abilities, and passion for technology to contribute to innovative projects. Eager to grow and learn within a dynamic team while helping the organization achieve its goals through efficient and effective software solutions.

Education

KSR Institute for Engineering and Technology, Tiruchengode **2021 – 2025**
UG - B.Tech in Information Technology *74%*

Govt. Higher Secondary School, Lakkapuram **2020 – 2021**
Higher Secondary School *87.50%*

Govt. Higher Secondary School, Lakkapuram **2018 – 2019**
Secondary School *83.20%*

Technical Skills

Programming Languages: Java, JavaScript, Python

Front-End: HTML5, CSS3, Reactjs

Backend and Database: SQL, Firebase

Tools: Git, GitHub, VS Code, Cursor, Figma, Canva, Netlify

Design: Adobe Photoshop, Adobe Illustrator

Internships

Cognifyz Technologies Pvt Ltd **Apr 2024 – May 2024**
Frontend Development Intern *Duration: 1 Month*

- Implemented tasks like form styling and validation, and integrated APIs to fetch data from back-end using HTML5, CSS3, and JavaScript.

Weblogix Technologies **Jun 2025 - Aug 2025**
WebScraper *Duration: 2 Months*

- Developed and maintained web scraping solutions using Python to extract, clean, and organize data from multiple websites.
- Automated data collection workflows, ensuring data accuracy and delivering structured datasets for business requirements.

Projects

Sneakify

- **Technologies Used:** React.js, React Native, Firebase Authentication, Cloud Firestore, Firebase Realtime Database, GitHub
- Developed a full-featured **E-commerce application** with product search, filtering, cart, wishlist, checkout, authentication, and order tracking.
- Engineered an **Admin Dashboard** and backend system for product CRUD operations, inventory control, user management, and order processing using Firebase, Firestore, and Realtime Database.Designed responsive UI/UX using React.js, Tailwind CSS, and Framer Motion, and developed a cross-platform **mobile app** using React Native.

Speech Emotion Recognition System Using Recurrent Neural Networks(RNN)

- **Technologies Used:** Artificial Intelligence (AI), Deep Learning, Python, HTML5, CSS3, JavaScript, Django, GitHub
- Developed an **RNN-based Speech Emotion Recognition system** achieving **96.96% accuracy**, outperforming CNN by **3.03%**.
- Built a **Django-based web application** for **real-time emotion prediction** and contributed to **UI, model development, testing, and deployment**.Published the research paper **"An Enhanced Speech Emotion Recognition System using RNN Compared with CNN"** at the **ICICCS Conference**.

Weather Monitoring System using IOT

- **Technologies Used: Internet Of Things(IOT), Raspberry PI, Arduino UNO/Nano/MEGA**
- Built an IoT-based weather monitoring system using Arduino. This project measures real-time temperature and humidity, sending data wirelessly for easy remote access and analysis of environemntal conditions.

Certifications

- Pandas and NumPy in Practice - Course Labz
- Front End Development(HTML) - Great Learning
- AWS S3 Basics - Coursera
- Python - DigiLabs
- Reactjs - Scaler
- Java (Basic) - HackerRank
- CSS (Basic) - HackerRank
- JavaScript (Basic) - HackerRank
- SQL (Basic) - HackerRank
- Problem Solving (Basic) - HackerRank

Achievements & Co-Curricular

- Workshop: Participated in a Two-Day workshop on Cybersecurity & Ethical Hacking conducted by the National Information and Cybersecurity Council (NICC) at KSR Institute for Engineering and Technology, Tiruchengode on 25th and 26th July 2023.
- Participated in Code Olympia, a National Level Coding Event in ABLAZE 2023 at KSR College of Engineering, Tiruchengode on 13th October 2023.

Area of Interest

- Web Development.
- UI & UX.
- Data Engineering
