OBJECTIVE

Electronics and Communication Engineering student graduating in 2027, seeking an entry-level IT or software role. Skilled in Python and data structures, with hands-on VLSI design experience, and eager to apply strong problem-solving ability while growing into new technologies.

EDUCATION

Vivekananda College of Technology for Women *2023 – 2027*

Bachelor of Engineering, Electronics and Communication Engineering | CGPA: 7.98 / 10

St. Tharsa's Girls Hr. Sec. School *2021 – 2022*

Higher Secondary (12th Standard) | 80%

SKILLS

Programming: Python, SQL (basic), Data Structures (basic)

Hardware / EDA: VLSI Chip Design, Verilog HDL, RTL Design, CMOS, Magic VLSI, NGSpice

Tools: Git & GitHub

Soft Skills: Problem Solving

INTERNSHIP EXPERIENCE

VLSI Intern — Ematix Embedded and Software Solutions *June 2026*

- Developed Verilog HDL programs and performed functional simulations for digital circuit designs.
- Worked with RTL design and CMOS concepts to build and verify hardware description modules.

PROJECTS

Student Management System *Python*

- Built a console-based application to add, update, delete, and search student records.
- Implemented file handling for persistent storage of student data.

CMOS Inverter Layout Design and Simulation *Magic VLSI, NGSpice*

- Designed a CMOS inverter layout and simulated it to verify and analyze the output signal.

ACHIEVEMENTS & CERTIFICATIONS

- ISO-Certified Python Programming Certification.
- Certificate of Participation — Workshop on Generative Engineering with AI Tools.
- Certificate in VLSI Chip Design — Ematix Embedded and Software Solutions.

LANGUAGES

Tamil, English, Urdu
