Professional Summary

B.Tech Information Technology graduate with hands-on experience in web development through a Full Stack Developer internship and academic projects. Skilled in Python, JavaScript, React.js, Node.js, MySQL, HTML, CSS, and Git. Experienced in developing web application modules, frontend-backend integration, and database-connected functionality. Seeking an entry-level opportunity in Full Stack Development or Software Development.

Education

- **Bachelor of Technology in Information Technology** — *2022 – 2026*
  K.S.R Institute for Engineering and Technology, Tiruchengode — CGPA: 7.47
- **Higher Secondary Certificate (HSC)** — *2021 – 2022*
  Sree Saravana Niketan Matric Higher Secondary School, Nerinjipettai — 74.3%
- **Secondary School Leaving Certificate (SSLC)** — *2019 – 2020*
  Brindavan Matriculation School, Thevur — 88.2%

Experience

Full Stack Developer Intern
Strackit, Coimbatore, Tamil Nadu — Mar 2024 – May 2024

– Worked on web application development using React.js and Node.js.
– Developed frontend components and responsive user interface features using React.js.
– Worked on login and signup functionality for web applications.
– Integrated frontend components with backend functionality and APIs.
– Used Git and GitHub for version control and project development.

Personal Projects

Grocery Delivery Application — *React.js, Node.js, MySQL*
A full-stack web application for browsing groceries, managing carts, and placing orders.

– Developed a full-stack grocery delivery application using React.js, Node.js, and MySQL.
– Implemented product browsing, cart management, checkout, and order management features.
– Developed responsive frontend components using React.js for a user-friendly shopping experience.
– Integrated frontend components with backend APIs and MySQL database functionality.
– Implemented user authentication for secure access to application features.

Expense Tracker Web Application — *HTML, CSS, JavaScript*
A responsive web application for managing personal income and expenses.

– Developed a responsive web application to manage personal income and expenses.
– Implemented features to add and delete transactions with real-time balance updates.
– Used browser Local Storage to persist transaction data across sessions.

Disease Prediction System — *Python, Pandas, XGBoost, NLP*
An ML-based system for predicting diseases from symptom-based patient data.

– Developed an ML-based disease prediction system using symptom-based patient data.
– Performed data preprocessing and symptom feature processing for model development.
– Applied NLP-based symptom extraction to process symptom-related inputs.
– Implemented XGBoost for disease classification and compared its performance with Random Forest.
– Evaluated the models using accuracy, precision, recall, and F1-score.

Technical Skills and Interests

Programming Languages: Python, Java, JavaScript

Web Technologies: HTML, CSS

Frontend: React.js, Bootstrap

Backend: Node.js

Database: MySQL

Tools: Git, GitHub, VS Code

Areas of Interest: Full Stack Development, Web Application Development, Software Development

Soft Skills: Problem Solving, Self-Learning, Adaptability, Communication

Certifications & Achievements

- **Certified Python Developer** – GUVI
- **Finalist** – UberTech-23 Web/Application Development

Languages

English, Tamil
