SUMMARY

Computer Science undergraduate with hands-on experience in AI-powered applications, data pipelines, and recommendation-driven systems, with growing exposure to agentic AI architectures. Skilled in Python, backend development, and applied machine learning, with experience building AI solutions across analytics and automation-focused projects.

SKILLS

Languages: Python, SQL, JavaScript/TypeScript

ML/AI: Machine Learning fundamentals, Scikit-learn, Pandas, NumPy, model evaluation

LLM/Agentic: LLM API integration, Prompt engineering, Agentic workflows, MCP, RAG

Data: Data Analysis, Data Visualisation, large dataset processing

Tools: Git, GitHub, Devops, Jupyter/Colab, VS Code

EDUCATION

Bachelor of Technology in Computer Science and Business Systems (2023-2027)
Dr. N. G. P. Institute of Technology, Coimbatore
CGPA: 7.92 (up to Semester VII)

PROJECTS

Cricket Strategy Support App (Python, React, MySQL)

Built a machine learning-powered cricket analytics platform that processes historical match data from CSV datasets to generate insights for shot recommendations, bowling recommendations, and field placements.

AI-Powered Cricket Pitch & Match Intelligence Platform (FastAPI, Python, TensorFlow/PyTorch)
Built an agentic cricket intelligence platform that analyses pitch conditions (via OpenCV) and live weather data (via OpenWeather API) to predict match strategy with integrating Gemini API-powered chatbot that generates conversational strategy plan.

JARVIS Voice Agent (Python)
Built a Python-based voice assistant that automates system tasks through natural voice commands, with integrated speech recognition and text-to-speech for two-way interaction, enabling hands-free system control and voice-based question answering.

Carbon Footprint Tracker (React, Node.js, MongoDB)
Developed a web-based sustainability platform that helps users log and track daily activities to calculate their carbon footprint, using a logic-based formula to track carbon emissions and provides personalised and predefined recommendations to help users reduce their environmental impact.

CERTIFICATIONS

Advancement in Model Context Protocol
Anthropic

Product Management with Applied AI (July, 2026- December,2026)
IIT Roorkee and Masai School

LANGUAGES

English — Professional Proficiency | Tamil — Native | German — Basic/Conversational
