CAREER OBJECTIVE

Enthusiastic and detail-oriented fresher seeking an opportunity to apply programming skills and technical knowledge in a challenging role that encourages professional development and innovation, while leveraging problem-solving abilities in a dynamic environment that fosters continuous learning and growth.

EDUCATION

Nandha Engineering College, Erode 2023 – 2027
*BE-CSE – CGPA – 8.5**

TECHNICAL SKILLS

- **Languages:** Python, Java, SQL
- **Databases:** MS SQL Server
- **Cloud & Big Data:** Azure Synapse Analytics, Databricks, Apache Spark, ETL Pipelines
- **Tools:** GitHub, VS Code

PROJECT

Farmer Query Support and Advisory System 2025

Tech Stack: Python, Node.js, Express, MongoDB, React, NLP, Machine Learning

- Developed a multilingual smart advisory platform enabling farmers to receive real-time support on crops, soil, pests, and climate-based issues.
- Implemented NLP-based query classification and ML models to recommend farming practices, fertilizers, and pesticide solutions with high accuracy.
- Integrated real-time weather APIs for location-based farming guidance.
- Built secure REST APIs with JWT authentication and a responsive web/mobile UI for rural accessibility.
- Designed an admin dashboard for query review, knowledge-base updates, and automated response improvement.

INTERNSHIPS

Lennox India Technology Centre, Chennai Jan 2026
Intern - Data Engineering and Analytics

- Gained hands-on experience with **Azure Synapse Analytics** for building data pipelines and querying large-scale datasets.
- Explored **Databricks and Apache Spark** for collaborative ETL workflows, data cleaning, and efficient big-data processing.

Cognifyz Technologies Jan 2025 – Feb 2025
Intern - Data Science

- Cleaned and transformed raw datasets, handled missing values, and addressed class imbalance to improve model reliability.
- Performed descriptive, geospatial, and customer preference analysis; visualized patterns in cuisines, ratings, and pricing.
- Built and evaluated ML models **(Linear Regression, Decision Trees, Random Forest)** to predict restaurant ratings and support data-driven decisions.
