PROFESSIONAL SUMMARY

Computer Science and Engineering (Cyber Security) undergraduate with hands-on experience in Core Java, SQL, and Object-Oriented Programming. Skilled in designing and developing efficient software solutions using Java and data structures. Seeking for a Software Engineer role to build scalable applications and contribute to enterprise software development.

EDUCATION

Nandha Engineering College **May 2023 – May 2027**
Bachelor of Engineering (B.E) – Computer Science and Engineering (Cyber Security) **CGPA: 8.5**

PERSONAL PROJECTS

Cash Flow Minimizer
https://github.com/Ragavan-coder/CASHFLOW-Optimizer.git

- Built a Java-based cash-flow optimization system using graphs and greedy algorithms to minimize settlement transactions implemented efficient debt netting while preserving participant balances.

Autonomous Enterprise Incident Response Agent

https://github.com/Ragavan-coder/Autonomous-Enterprise-Incident-Response-Agent.git

- Built an GenAI incident-response agent using RAG, tool calling, and agent orchestration for automated root-cause analysis implemented log/metric analysis, remediation approval, and incident verification.

Real-Time Route & Traffic Optimization Engine
https://github.com/Ragavan-coder/RealTime-Navigation.git

- Built a route optimization engine using Dijkstra, graphs, and priority queues for dynamic traffic conditions implemented real-time route recalculation based on changing traffic and road weights.

Chess Engine System
https://github.com/Ragavan-coder/dsa-chess-engine.git

- Built a Core Java chess engine with legal move generation, board-state management, and check/checkmate detection applied DSA, recursion, backtracking, and search algorithms for gameplay and move validation.

DriveLegal-AI-Powered Traffic Law Assistant
https://github.com/Ragavan-coder/Driverlegal.git

- Developed an AI-powered traffic law assistant using React, Ionic, Node.js, Express.js, Lang Chain, OpenAI, SQL Cipher, AWS, Tesseract.js OCR, and OpenStreetMap APIs.

INTERNSHIPS

Cybersecurity Intern CUSITE Lab **Jun 19 2025 – July 4 2025**

- Performed vulnerability assessments and security testing using industry-standard security tools in a controlled lab environment.

Technical Supportive Intern StudAi **Aug 1 2025 – Oct 30 2026**

- Contributed to software development tasks using Java, SQL, Git, and REST APIs, while collaborating with the development team on real-world projects.

Data Science Intern (Part-time) Sabudh Foundation **Nov 1 2025 – April 30 2026**

- Built data analysis and machine learning workflows using Python, Pandas, NumPy, Scikit-learn, and Jupyter Notebook on real-world datasets.Performed data preprocessing, visualization, and predictive modeling to generate insights and improve model performance.

TECHNICAL SKILLS

Languages: Java , SQL, JavaScript ,Python
Frameworks: Spring Boot, React.js
Tools & Platforms: Docker, AWS, kali linux, MySQL , MongoDB

CERTIFICATIONS

- Google Cybersecurity Professional Certificate — Google (Coursera) & Google AI Essentials — Google (Coursera) SQL Injection Attacks — EC-Council, EC-Council (Hack the AI Agent)
- Cybersecurity Certification — Cisco Networking Academy
