Concepts: OOP, Data Structures & Algorithms, MVC, Agile/Scrum, SDLC

EXPERIENCE

Java Developer - Intern
Pargavan Cyber Solution *Feb 2026 - Aug 2026*

- Developed Spring Boot REST APIs, Core Java modules, and React.js UI components, contributing to 3 production features shipped on schedule.
- Executed MySQL queries using JDBC and Spring Boot, and validated APIs in Postman, cutting the defect rate by 25%.
- Collaborated in an Agile team using Git (branching, PRs, code reviews) to maintain code quality and meet sprint deadlines.

Java Intern
Penta Software Solution *Jun 2023 - Jul 2023*

- Built mini projects using Core Java and OOP principles & Developed Java applications with collections and exception handling, connected to MySQL using JDBC.

PROJECTS

Role-Based Healthcare Management System | Github
Java, Spring Boot, Spring Security, JWT, React.js, MySQL, Spring Data JPA, JUnit 5, Postman

- Built a role-based healthcare backend with Spring Boot and Java 21, securing 15+ REST endpoints using Spring Security and JWT.
- Designed normalized MySQL schemas with indexed JPA relationships, improving appointment lookup and search performance.
- Implemented centralized error handling with @ControllerAdvice and wrote JUnit 5 unit tests for service layer reliability.

AI-Powered Intelligent Document Summarizer | Github
Java 21, Spring Boot, Spring AI, Google Gemini API, React.js, PostgreSQL, JWT, Github Copilot

- Built a full-stack GenAI summarizer using Spring AI and Google Gemini API, accelerated with GitHub Copilot.
- Created PDF, DOCX, and TXT upload pipelines with custom prompt templates and REST APIs for real-time processing.
- Designed a normalized PostgreSQL schema for document history and tested file size limits and API timeouts in Postman.
