CAREER OBJECTIVES

Objective (Software Development)

Entry-level Software Developer and Computer Science Engineering graduate seeking an opportunity to apply my skills in Java, Python, web development, database management and problem-solving to develop reliable and user-friendly software applications. Eager to work in a collaborative environment where I can enhance my technical abilities, learn modern development practices, contribute to real-world projects and grow as a skilled software professional.

EDUCATION

- **Bachelor of Engineering – Computer Science and Engineering**
  Government College of Engineering Srirangam, Trichy, *2023 – 2026, CGPA: 8.1*
- **Diploma – Computer Engineering**
  Alagappa Government Polytechnic College, Karaikudi, *2020 – 2023, Percentage: 94%*

INTERNSHIP & TRAINING

Concepts of Digital Marketing and Web Development – Layercodes - *June 2025 – August 2025*

- Gained practical exposure to web development concepts and digital marketing fundamentals
- Worked with basic HTML, CSS and web development technologies
- Learned fundamentals of creating and maintaining web pages and understanding digital marketing strategies

Next Generation Data Networking – Bharat Sanchar Nigam Limited (BSNL)- *July 2022*

- Gained practical knowledge of Next Generation Data Networking technologies, modern telecom architectures and networking protocols.
- Received hands-on training in cable splicing, Ethernet cable setup, cable management and networking equipment handling.
- Gained practical understanding of network infrastructure and data communication systems.

TECHNICAL SKILLS

- Languages: Java, Python, HTML & CSS, JavaScript
- Database: MySQL, MongoDB
- Tools: Visual Studio Code, GitHub

CERTIFICATIONS

- Python for Data Science Certification
- Web Designing Certification

PROJECTS

A Predictive Analysis on CO2 Emissions in Automobiles using Machine Learning Techniques

- Machine learning-based web application developed using Python, Flask, HTML, CSS, and JavaScript
- Implemented data preprocessing, feature engineering, model training, and performance evaluation using multiple machine learning algorithms
- Predicted vehicle CO_2 emissions based on vehicle parameters

SkyPulse – Realtime Weather

- Responsive weather application developed using React.js, Axios, JavaScript, HTML and CSS
- Integrated OpenWeather API to fetch and display real-time weather information for different cities
- Displays temperature, feels-like temperature, humidity, wind speed, pressure, weather condition and coordinates

---

KEY SKILLS

- Java
- Mysql
- HTML
- CSS
- Javascript
