Professional Summary

Motivated and detail-oriented Electronics and Communication Engineering graduate with hands-on experience in embedded systems, IoT, Arduino, and C programming. Skilled in developing practical electronic solutions involving sensors, GPS, GSM, and microcontrollers. Completed projects including a Solar Tracking System and a Vehicle Accident Detection and Emergency Alert System, demonstrating strong problem-solving, programming, and hardware integration skills. Eager to begin a career in Embedded Systems, Electronics, IoT, or related engineering roles and contribute to innovative real-world solutions.

Technical Skills

Programming Languages: C, Java, HTML, CSS, Python(Basic), Matlab(Basic)
Embedded / Hardware: Arduino, Microcontrollers, Sensors, IoT, Circuit Design(Basic), PCB Design(Basic), Embedded C, GPS & GSM Modules.
Tools: VS Code, Arduino IDE, KiCad, MATLAB, Excel
Soft Skills: Communication, Problem Solving, Time Management, Teamwork

Internship Experience

Kio Tech *Dec 2025*
Web Development Intern

- Completed a 15-day internship in Web Development, gaining hands-on experience in HTML, CSS, responsive web page design, and basic frontend development.

UCAL Limited *Jun – Jul 2026*
Manufacturing Process Intern

- Completed a 1-month internship with practical exposure to manufacturing processes, automated equipment, process monitoring, quality inspection, and industrial operations.

Projects

Vehicle Accident Detection and Emergency Alert System

- Designed an IoT-based embedded system using Arduino Uno, ADXL335 accelerometer, SIM900A GSM module, and NEO-6M GPS module.
- Detected sudden acceleration/impact, fetched real-time GPS coordinates, and auto-sent emergency SMS alerts to predefined contacts.

Disaster-Resilient Emergency Communication Network

- Developed an offline emergency alert system using Arduino Nano and NRF24L01 RF modules.
- Enabled wireless transmission of HELP, FIRE, and MEDICAL alerts with LCD display.
- Integrated victim details and GPS location for faster rescue response.

Solar Tracking System

- Developed an automatic solar tracking system using light sensors and a servo motor.
- Programmed the system using Arduino IDE and C programming to track the sun's position.
- Improved solar panel efficiency and energy generation by maintaining optimal sunlight alignment.

Education

Excel Engineering College *2023– 2027*
Bachelor of Engineering in Electronics and Communication Engineering CGPA: 7.55/10

Certifications

- Realtime Programming for QNX OS – QNX (BlackBerry): Completed real-time programming training
- Ignite India – Wadhwani Foundation: Completed 42-hour entrepreneurship training
- Responsive Web Design — LT EduTech

Languages

English: Professional Working Proficiency
Tamil: Native Proficiency
Telugu: Conversational (Speaking & Understanding)
