SUMMARY

Final-year **Computer Science and Engineering** student with hands-on experience in AI/ML and Full Stack Development. Skilled in developing scalable web applications, integrating AI-powered solutions, and building secure, high-performance software systems. Proficient in Java, Python, JavaScript, SQL, and modern development frameworks. Passionate about innovation, problem-solving, and delivering impactful technology solutions.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering *Sep 2023 – Apr 2027*

Vivekanandha College of Engineering for Women, Tiruchengode *CGPA:* 8.2

PROJECTS

QUIZ WEB APPLICATION | *HTML, CSS, Bootstrap, Javascript* ***(GitHub)***

- Developed a responsive **quiz web application** with user registration, login authentication, client-side form validation, and an instruction module for a seamless **user experience (UX)**, and cross-device compatibility.
- **I**mplemented dynamic quiz functionality using JavaScript to evaluate user responses, calculate scores and display the final results through an interactive **dashboard**, and provide **performance feedback**.

SKILLS

- **Web Development:** Html, Tailwind CSS, Javascript
- **Model Development:** Fine-tuning Pretrained Models, Tokenization Techniques
- **Cybersecurity**: Threat Analysis, Incident Response, Risk Assessment, Governance & Compliance
- **Programming & Scripting**: C++, Python, Java (Basics)
- **Databases:** Mysql, MongoDB
- **Soft Skills:** Analytical Thinking, Communication, Stakeholder Coordination, Collaboration

EXPERIENCE

Panacea Medical Technologies Pvt. Ltd | ***Web Application Development Intern*** **(*Jun 2026 - Jul 2026)***

- Gained hands-on experience in front-end web development using **HTML, CSS, Bootstrap, and JavaScript**, developing responsive and interactive web interfaces with modern UI design principles.
- Worked with **Local Storage** to implement client-side data persistence, strengthening skills in DOM manipulation, form validation, user session management and dynamic content rendering for enhanced **UX**.

EBPL | ***Generative AI Intern*** ***(Oct 2025)***

- Gained practical knowledge of **Artificial Intelligence, Machine Learning, and Generative AI** concepts through structured internship training strengthening core **AI fundamentals** and analytical thinking.
- Worked with **AI tools and techniques**, understanding their implementation in real-world problem-solving.
- Explored **Generative AI applications** and their use cases across various industries.

CERTIFICATIONS

- Oracle – Certified Cloud Infrastructure
- Automation Anywhere – Certified Essentials Automation Professional
- Wadhwani Foundations – Problem Solving & Innovation
- Autodesk – Introduction to BIM for AE
- Microsoft – Generative AI
- Celonis – AI Foundation
- IBM – Artificial Intelligence
- UI Path

EXTRACURRICULAR

- Hosted college cultural events, ensuring smooth event coordination and effective stage management.
- Led teams in national and inter-college hackathons, driving collaboration, and effective problem-solving.
- Volunteered in college events, contributing to event planning and community engagement initiatives.
