KABEESH N G

+91-9080171527 — kabeeshnagaraj@gmail.com — LinkedIn

Professional Summary

Passionate Electronics and Communication Engineering student with a strong enthusiasm for VLSI Design and Embedded Systems. Proficient in Verilog HDL, Embedded C, ESP32 development, FPGA fundamentals, and Digital Electronics. Interested in designing efficient hardware solutions and exploring next-generation semiconductor technologies. Eager to apply technical knowledge, problem-solving skills, and innovation in real-world hardware and chip design projects.

Education

B.E. Electronics and Communication Engineering

KSR Institute for Engineering and Technology CGPA: 6.59/10 — 2023–2027

Higher Secondary Examination (HSE)

Government Boys Higher secondary school , Anthiyur
Percentage: 60% — 2021–2023

Technical Skills

- VLSI: Verilog HDL, Combinational & Sequential Circuits, Simulation, Verification
- Embedded Systems: Embedded C, ESP32, Microcontroller Programming, Sensor Interfacing
- Tools: EDA Playground

Projects

IoT Driven Real Time Car Parking Monitoring And Secure Slot Booking System

- Developed an loT-based smart parking system for real-time parking slot monitoring and management
- Implemented real-time slot availability tracking using sensors to detect vehicle presence

Color based Product Sorting using Esp32

- Designed and developed an ESP32-based automated color sorting system for product classification.
- Integrated a color sensor to accurately detect and identify different product colors.

Internships

- IoT Intern – Techvolt Software Pvt. Ltd. (15 Days)
- Data AnalyticsIntern – IDM Techpark (15 Days)

Certifications

- Functional Verification using SystemVerilog and UVM
- RTL Design using Verilog HDL

Soft Skills

- Collaborative Teamwork
- Quick Learning Ability
