EDUCATION

B.E-Electronics and Communications Engineering

KSR INSTITUTE FOR ENGINEERING AND TECHNOLOGY, NAMAKKAL

09/2023 09/2027

SUMMARY

Motivated ECE engineering student combining strong analytical reasoning with a solid understanding of logic flows and system workflows. Experienced in structured problem-solving through hands-on technical projects and internships. Seeking to transition these technical and analytical capabilities into a professional environment focused on business operations and strategic problem-solving."

EXPERIENCE

Basics of Electronics Using Arduino

Hailstone Technology

07/2024 07/2024 Coimbatore, TAMILNADU

www.hailstonetechnology.in
info@hailstonetechnology.in

- Gained hands-on experience with Arduino, learning basics of electronics, programming, and project design.
- Worked with sensors, actuators, and communication protocols, implementing projects like smart home automation and line following robot.
- Developed skills in designing and implementing simple electronics projects using Arduino.

Basics ofVLSI design

NXTGEN INSTRUMENTS 06/2025 06/2025 Erode, TAMILNADU

nxtgeninstrumentsind@gmail.com

- Gained foundational knowledge of VLSI design flow, learning Verilog HDL, simulation, and synthesis.
- Worked with EDA tools, designing and verifying basic digital circuits, and understanding concepts like RTL, netlist, and layout.
- Developed skills in designing and implementing simple digital circuits using Verilog, preparing for advanced VLSI design projects.

LANGUAGES

- Kannada
- Tamil
- English

KEY ACHIEVEMENTS

K **Completed coursework in Digital Electronics, Embedded Systems.**

Demonstrated strong foundation in core ECE subjects, highlighting ability to grasp complex concepts and apply them to real- world problems.

K **Completed NPTEL/Udemy certifications in VLSI Design**

Demonstrated commitment to continuous learning and professional development, highlighting expertise in specialized areas.

SKILLS

- Analytical and Problem Solving
- Programming and Logic
- Data and Hardware Systems

TRAINING / COURSES

- VLSI for beginners
- Become Digital Electronics Master
- RTL Design & Functional Verification
- IoT Based System Design

INTERESTS

- Data & Technology Trends
- System Optimisation
- ASIC Design Flow
