PRITHIKA A

Embedded Engineer

9080236479
Dharmapuri (DT)

Email id: prethi759@gmail.com **LinkedIn:** linkedin.com/in/prithika-ayyandurai-004868299

CAREER OBJECTIVE

Electronics and Embedded Systems Engineer with hands-on experience in embedded systems, microcontroller programming, and MATLAB, seeking an opportunity in product development and embedded hardware design.

EDUCATION

GOVERNMENT HR SEC SCHOOL, ERIYUR:
SSLC – PASS and HSC – 84.33%

B.E –ELECTRONICS AND COMMUNICATION ENGINEERING:
Government College of Engineering, Salem (2023-2027):
CGPA = 7.87/10 (up to 6th semester)

RELAVANT COURSEWORK

- Microprocessor and Microcontrollers
- Embedded Systems
- Analog and Digital Electronics
- Network Analysis

TECHNICAL SKILLS

- Embedded Systems: ESP32, Microcontrollers, Arduino
- Programming languages: C, C++, PYTHON, JAVA
- PCB Design (Basic) : KiCad

WORKSHOPS

- Hands-on Training on Electronic Measuring Instruments
- Embedded Systems with IoT
- Smart Embedded Systems (AI-powered solutions using STM32 And Nano edge AI)

PROJECTS

AI-Based Fall Detection System: Developed a real-time fall detection system using ESP32 and LD2410 mmWave radar. Collected motion and distance data for activity classification using machine learning techniques. Integrated Firebase for cloud data storage and implemented real-time monitoring and emergency alert notifications through a mobile application.

Earthquake Detection System: Developed an IoT-based earthquake detection system using STM32 and vibration sensors to monitor ground vibrations. Implemented real-time seismic activity detection and alert generation, with Wi-Fi-based data transmission for remote monitoring and safety applications.

INTERNSHIP

Tamirabot advanced engineering pvt ltd

Developed a 15A Smart Wall Socket with 4G, NFC, and Temperature Monitoring, integrating sensors and communication modules for real-time intelligent plug control and IoT-based automation for EV vehicles.
