CAREER OBJECTIVE

Motivated Electronics and Communication Engineering student seeking an entry-level Software Engineer role to apply my technical skills, engineering knowledge, and problem-solving abilities while contributing to organizational growth and continuous learning.

EDUCATION

Bachelor of Engineering - Electronics and Communication Engineering 2023 – 2027
Government College of Engineering, Salem Salem
CGPA: 8. 74(up to 6th semester)

Higher Secondary Certificate (HSC)
Tamil Nadu State Board
Percentage: 94.16%

Secondary School Leaving Certificate (SSLC)
Tamil Nadu State Board
Percentage: 100%

TECHNICAL SKILLS

Programming Languages
Java, Python, C++, C

Computer Science Fundamentals
Object Oriented Programming

Tools and Technologies
HTML, CSS, JavaScript, MySQL, Git and GitHub

WORKSHOPS AND CERTIFICATES

Embedded Systems with IoT Workshop 26/03/2025
One-day workshop

Hands-on Training on Measuring Instruments 22/04/2025
One-day workshop

Generative AI Workshop
Conducted by HCLTech and GUVI

AI/ML Engineer Intern internship at Ocean Pulse Health, Salem (16/04/2026 – 16/05/2026)
- Developed an AI-powered research assistant for academic paper research and study purposes.
- Built a conversational chatbot that helps users interact with and understand research papers.
- Worked with AI, NLP, and information retrieval concepts.

CO-CURRICULAR ACTIVITIES

- Acting as an Industrial visit coordinator for my class enhanced my leadership, communication, coordination and planning skills.
- Participant in world record of largest Fingerprint portrait of Dr. B.R. Ambedkar organized by Arts club.
- Active participant in sports competitions.

HACKATHON

TANCAM Hackathon – External Hackathon Participant 04/04/2025
Participated in the hackathon conducted by Tamil Nadu Centre of Excellence for Advanced Manufacturing Hosur
at Er.Perumal Manimekalai college of Engineering

Smart India Hackathon(SIH) 2025 – Internal Hackathon Participant 17/09/2025
Participated in the internal college-level hackathon

PROJECT

Privacy-Preserving Human Fall Detection & Emergency Alert System
Tech Stack: ESP32, LD2410 mmWave Radar Sensor, Machine Learning, Firebase Realtime Database, MIT App Inventor
- Developed a privacy-preserving fall detection system using LD2410 mmWave Radar and ESP32 for contactless activity monitoring.
- Applied Machine Learning for activity classification and fall detection.
- Integrated Firebase and a Telegram Bot to provide emergency alerts and real-time monitoring.
- Built a mobile monitoring application using MIT App Inventor for viewing activity status and alerts.

Production Planning and Control – Manufacturing Workflow and Resource Management
Tech Stack: Java, MySQL, Swing GUI
•Developed a desktop application for production scheduling and workflow optimization
•Implemented inventory tracking and work order management modules
•Enabled real-time monitoring with dashboards for capacity planning
