CAREER OBJECTIVE

Cyber Security student pursuing B.E. in CSE (Cyber Security) with hands-on exposure to VAPT, Web, Mobile, API, and Network Security. Skilled in Burp Suite, Nmap, MobSF, JADX, Frida, ADB, Wireshark, and Postman for security testing and vulnerability analysis. Strong in vulnerability validation, evidence-based analysis, and security documentation. Seeking a Cyber Security/VAPT internship to apply practical skills and develop real-world penetration testing expertise.

TECHNICAL SKILLS

- **Programming & Scripting :** Python (Basic), HTML, CSS, Bash
- **Security Standards :** OWASP Top 10, OWASP Mobile Top 10
- **AI Security Labs:** PortSwigger LLM Labs, Hackaprompt(Prompt Injection)
- **Network & Web Security** : Nmap, Burp Suite, Gobuster, Dirsearch, WPScan, Kali Linux, Nessus
- **Security Labs :** Metasploitable 2, DVWA
- **Security Domains:** VAPT, Web Application Security, Mobile Application Security, Network Security

PROJECTS

RELOCAL - AI-Assisted VAPT Reporting Platform

- Developed a localhost -based VAPT reporting platform to manage security findings, Proof of Concept (PoC) evidence, vulnerability details, and remediation.
- Implemented AI-assisted vulnerability classification with CVSS, CWE, and OWASP mapping, along with impact analysis and remediation recommendations reviewed by the tester.
- Automated professional VAPT report generation, including evidence, detailed security findings, risk summaries, and PDF export using ReportLab.

CERTIFICATIONS & TRAINING

Null Origin CTF Participation Certificate 2026

H7TEX CTF Certificate of Participation 2026

- **C-DAC OS Bug Bounty Event** - Participation Certificate Hacker Centre for Development of Advanced Computing 2026
- Holidays Completion Certificate
- **eJPT (Junior Penetration Tester) -** pursuing

HANDS-ON EXPERIENCE

- **OWASP Juice Shop** – Performed hands-on web application security testing and vulnerability validation across authentication, authorization, injection, XSS, session management, and access control scenarios using Burp Suite.
- **OWASP WebGoat** – Conducted guided security assessments covering injection, authentication, authorization, session management, insecure design, and server-side vulnerabilities, with findings analyzed and validated in a controlled environment.

HANDS-ON LABS

- TryHackme - Rank 7%
- PortSwigger - Solved 40+ Labs
- OWASP - Broken Web Apps
- CyLabs security academy - 40+ Labs

LANGUAGES

- Tamil
- English

EDUCATION

Bachelor of Engineering (B.E.) - CSE (Cyber Security) 2023 - 2027

Sri Shanmugha College of Engineering and Technology CGPA : 7.5/10
