CAREER OBJECTIVE

Motivated B.Sc. Computer Science student with hands-on experience in Python, HTML, SQL, built through academic projects and a 15-day software development internship. Skilled at building working backend applications and eager to contribute problem-solving and logical thinking to an entry-level software development role.

EDUCATION

B.Sc. Computer Science — KSR College of Arts and Science for Women, Namakkal | *2024 - 2027 (III Year)*

- CGPA: 9.2

Higher Secondary (12th) — Little Angels Hr. Sec. School | *Percentage: 82.8%*

SSLC (10th) — Surabi Matric Hr. Sec. School | *Percentage: 82%*

TECHNICAL SKILLS

- Programming Languages: Python, SQL, HTML
- AI Tools: ChatGPT, Claude, Gamma, Canva, Google Flow

INTERNSHIP EXPERIENCE

Python Development Intern — Nandha Infotech, Coimbatore | *15 Days | May-June 2026*

- Completed a hands-on internship focused on Python backend development fundamentals using FastAPI and Flask.
- Built and tested REST APIs and practiced SQL and MongoDB for database operations.
- Practiced data handling and analysis using Python libraries such as NumPy and Pandas.
- Worked with Docker and Groq API for AI-integrated application development.

Cybersecurity Analyst Job Simulation — Tata Consultancy Services (via Forage) | *August 2026*

- Completed a virtual job simulation covering Identity and Access Management (IAM) fundamentals and strategy assessment.
- Crafted custom IAM solutions and practiced platform integration techniques.

PROJECTS

CareBand AI — Smart Health Monitoring Band | *Final Year Project*

- Built an AI-powered health monitoring system using Python, FastAPI, SQL, and HTML/CSS/JS to track and analyze vital health parameters.
- Designed backend logic to process real-time health data and generate AI-based alerts and care recommendations.

GeoMark Pro — Geolocation Tracking Web App

- Built a location tracking system using FastAPI, MongoDB (PyMongo), and Pydantic.
- Implemented CORS-secured REST APIs for user authentication and for saving/retrieving geolocation data.

AI Chatbot Application

- Developed an AI-powered chatbot using FastAPI and Groq API to generate intelligent, context-aware responses.
- Used environment-based configuration (.env) for secure API key management.

CERTIFICATIONS

- Certificate of Participation – Vyuga Hackathon (CareBand AI)
- NPTEL Certification — Introduction to Internet of Things (IoT) and Cloud Computing
- Typewriting (Junior Grade) — Passed in First Class

STRENGTHS

- Quick learner with strong interest in problem-solving and logical thinking.
- Solid foundational understanding of programming and database concepts through academic and internship experience.
- Adaptable to new technologies and eager to take on challenging tasks.
