PROFILE

Enthusiastic Electronics and Communication Engineering student pursuing a career in Embedded Systems, IoT, PCB Design and Firmware. Interested in applying Embedded C and Python skills to practical hardware-software solutions while continuously learning and contributing to engineering teams.

EDUCATION

B.E. – Electronics & Communication Engineering	K.S.R. College of Engineering
12th Standard	77%
10th Standard	80%

TECHNICAL SKILLS

- Programming: Embedded C, Python
- Embedded & IoT: Arduino, IoT fundamentals, sensor interfacing
- Hardware: PCB Design, electronic components, circuit design
- Professional: Problem solving, teamwork, quick learning, communication

PROJECTS

Automatic Light ON/OFF Using Arduino

- Built an automated lighting system using Arduino and sensors.
- Implemented automatic switching based on detected environmental conditions.
- Handled programming, hardware interfacing and testing.

AI-Based Battery Health Monitoring System

- Developed a concept for monitoring battery health and performance.
- Explored AI-based analysis for identifying battery condition.
- Worked on data monitoring and system-level evaluation.

INTERNSHIP

Pantech Solutions | Embedded / IoT Intern

- Gained practical exposure to embedded systems and IoT technologies.
- Practiced programming, hardware interfacing and basic embedded development.
- Developed an understanding of real-world engineering workflows.

AREAS OF INTEREST

Embedded Systems • IoT • Firmware Development • PCB Design • Electronics • Automation

CAREER FOCUS

Seeking an entry-level opportunity as an Embedded Systems / IoT Engineer where I can apply my fundamentals, gain industry experience, and contribute to reliable connected products.
