Career Objective

Motivated and enthusiastic Electronics and Communication Engineering graduate seeking an Internship-to-Full-Time opportunity in Embedded Systems, Digital Design, PCB Design, and IoT. Passionate about developing innovative hardware and embedded solutions with strong problem-solving abilities and a willingness to continuously learn emerging technologies.

Education

Bachelor of Engineering (B.E.) – Electronics and Communication Engineering
Sri Shanmugha College of Engineering and Technology
2022 – 2026 CGPA: 7.4

Higher Secondary Education
Government Boys Higher Secondary School, Sivagiri
2021 – 2022 Percentage: 60%

Technical Skills

- C Programming
- Embedded Systems
- Digital Electronics
- Digital System Design
- PCB Design
- MATLAB

Professional Training

Elite Systems and Controls
Inplant Training – Microcontroller Programming and Interfacing

- Learned microcontroller architecture and Embedded C programming.
- Interfaced sensors and peripheral devices with microcontrollers.
- Gained practical knowledge in embedded hardware development.
- Worked on real-time embedded applications.
- Improved debugging and hardware interfacing skills.

Projects

Final Year Project
Metabolic Risk Prediction and Monitoring System for Prediabetic Patients

- Developed an IoT-based healthcare monitoring system for early prediction of metabolic risks in prediabetic patients.
- Integrated multiple health sensors to collect physiological parameters in real time.
- Implemented continuous monitoring and data analysis for early risk identification.
- Designed the system to support preventive healthcare and remote patient monitoring.
- Improved healthcare accessibility through real-time monitoring and intelligent data processing.

Mini Project
Monitoring Working Hours Using PIR Sensor and Current Sensor

- Developed a smart monitoring system using PIR and Current Sensors.
- Designed to monitor employee/equipment working hours automatically.
- Improved automation and efficient equipment usage monitoring.
- Enhanced system reliability using sensor-based detection.

Certifications

- Microcontroller Programming and Interfacing
- Digital System Design – Edveon

Languages

- Tamil
- English
