PROFESSIONAL SUMMARY

Final-year B.Tech student in Artificial Intelligence and Data Science with hands-on experience in Python, SQL, data analysis, data interpretation, and data visualization through academic projects and internships. Skilled in data cleaning, data wrangling, exploratory data analysis, statistical analysis, trend analysis, and predictive modeling using machine learning. Seeking a Data Analyst role to apply analytical and technical skills for data-driven decision making and generating actionable business insights.

SKILLS

- Programming Languages: Python, Java, C++
- Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Microsoft Excel
- Machine Learning: Scikit-learn, Random Forest, NLP (Natural Language Processing), Predictive Modeling
- Databases & Tools: SQL, Django, Flask
- Soft Skills: Analytical Thinking, Problem Solving, Communication, Teamwork

EDUCATION

B.Tech, Artificial Intelligence and Data Science - Vivekanandha College of Technology for Women (2023 - 2027, Final Year)
Cumulative GPA: 7.96 / 10

EXPERIENCE

Python Project Intern, Cybernaut Edu Tech (3 Months)
- Developed Python-based applications using Django and Flask, applying Machine Learning techniques to build and deploy model-driven web applications.

Web Development Intern, Codebind Technologies (10 Days)
- Completed a short-term industry internship, gaining hands-on experience in web development fundamentals and front-end/back-end workflows.

Inplant Trainee, Web Development, Codebind Technologies
- Completed inplant training focused on practical web development concepts, tools, and industry practices.

PROJECTS

Email Spam Classifier - Python, Machine Learning, NLP, Flask
- Built and deployed a machine learning web application that classifies emails as Spam or Not Spam using Natural Language Processing (NLP), with a Flask frontend accepting email text for real-time prediction.

Skin Disease Classification - Python, Machine Learning, Image Classification
- Engineered an AI-based web application that detects skin diseases from uploaded images using a trained machine learning classification model.

Sleep Quality Predictor - Python, Flask, Random Forest, Machine Learning
- Designed and built a Flask-based machine learning application that predicts sleep quality from user health and lifestyle data using a Random Forest model.

Smart Traffic Violation Logger - Web Development, Database Management
- Developed a web-based traffic violation management system to register, track, and update violation records and status in a centralized database.

WORKSHOPS AND HACKATHONS

- Participated in Smart India Hackathon (SIH) 2026 as a member of Team CodeGenix.
- Attended National Workshop on Python for AI and ML, in association with ABLAZE-2K24, K.S.R. College of Technology for Women.
- Attended Workshop on Artificial Intelligence conducted by Codebind Technologies.
- Completed a Python Project Internship.

CERTIFICATIONS

- CVESD Certification Course in C++ - Passed with A+ Grade
- Python Programming Certification
- Java Programming Certification
- C++ Programming Certification

ACHIEVEMENTS

- Achieved 3-Star Badge in Java, Python, and C++ on HackerRank.
