# SHRUTHIKA MURUGAN

**Computer Science Engineering Student — Software Developer**

Tamil Nadu, India — yourmail@gmail.com — +91-XXXXXXXXXX

LinkedIn — GitHub

## PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience in **Java, SQL, JavaScript, React.js, Node.js, MongoDB and REST API development**. Experienced in developing web-based applications, database integration, debugging, software testing and technical documentation. Strong understanding of **Object-Oriented Programming, SDLC, DBMS, problem solving and software validation**. Interested in software development, application support and enterprise technology solutions.

## TECHNICAL SKILLS

| | |
|---|---|
| **Programming Languages** | Java, Python, JavaScript, SQL |
| **Web Technologies** | HTML5, CSS3, React.js, Node.js, Express.js |
| **Databases** | MySQL, MongoDB |
| **Blockchain Technologies** | Hyperledger Fabric, IPFS, Blockchain, Smart Contracts |
| **Core Concepts** | OOP, Data Structures and Algorithms, DBMS, SDLC, REST APIs, CRUD, Debugging, Testing |
| **Tools** | Git, GitHub, VS Code, Postman, Vite |

## EDUCATION

**B.E. Computer Science and Engineering** — **Expected 2027**

K.S.R. Institute of Engineering and Technology — **CGPA: 8.49**

**Higher Secondary Education (HSC)** — **78%**

## PROJECTS

**Decentralized Vehicle Data Storage using IPFS & Hyperledger Fabric** *React.js, Node.js, MongoDB, IPFS, Hyperledger Fabric*

- Developed a decentralized web application for secure vehicle data and document management.
- Implemented IPFS-based document storage and generated unique Content Identifiers (CIDs) for vehicle documents.
- Integrated Hyperledger Fabric to maintain tamper-resistant vehicle metadata and transaction records.
- Developed REST APIs for vehicle registration, data management and document retrieval.
- Designed MongoDB operations for vehicle, user and application information.
- Performed application testing, debugging and validation of system modules.

**Smart Student Attendance System** *React.js, Node.js, JavaScript, SQL*

- Developed a web-based attendance management application using React.js and Node.js.
- Implemented location-based attendance validation to improve attendance accuracy.
- Designed responsive interfaces for students and administrators.
- Implemented CRUD operations for student and attendance records using SQL.
- Tested application workflows and resolved functional and integration issues.

**Student Assignment Submission & Tracking System** *React.js, JavaScript, Firebase, MongoDB*

- Developed a web application for digital assignment submission and tracking.
- Implemented user-oriented interfaces for assignment management and submission tracking.
- Integrated database services for storing assignment and student information.
- Performed functional testing and debugging to improve application reliability.

## CERTIFICATIONS

- NPTEL Certification – *[Course Name]*
- AWS / Cloud Certification – *[Course Name]*
- MATLAB Certification
- Blockchain as a Service using AWS – Alison
- Udemy Certifications – Programming / Web Development
- Coursera Certification – *[Course Name]*

## ACHIEVEMENTS

- Earned **3-Star rating in Java on HackerRank**.
- Participated in technical presentations and college-level project activities.
- Participated in hackathon and innovation-based technical activities.

## CORE STRENGTHS

Problem Solving — Analytical Thinking — Debugging — Quick Learning — Team Collaboration — Technical Documentation

## LANGUAGES

English — Tamil — Kannada
