Summary

Enthusiastic and dedicated Computer Science student with a strong foundation in programming, data structures, and web development. Eager to apply technical knowledge and problem-solving skills to real-world projects. Passionate about learning new technologies and contributing to innovative solutions.

Professional Experience

Full Stack Developer Intern, Browzone Infotech — Erode, India

Projects

AI Rental House Chatbot
- Developed an AI-powered chatbot that helps users find rental houses in any location based on their preferences.
- Integrated natural language processing to understand user queries and provide relevant house recommendations.
- Features include location-based search, filters (budget, type, amenities), and real-time suggestions.

LifeLens AI – Personal Life Management Assistant
- Built an AI-based personal assistant to manage notes, documents, expenses, calendar, reminders, and daily tasks in one platform.
- AI search helps users find information instantly (e.g., "Last month expense report").
- Includes AI daily planner and memory assistant to improve productivity.

AI Resume Screening System
- Developed an AI application that analyzes resumes and provides a match score based on job description.
- Extracts key skills, qualifications and evaluates candidate suitability.
- Provides feedback and improvement suggestions to enhance resumes.
