SUMMARY

Motivated Computer Science and Business Systems student with a growing foundation in Java programming and DevOps practices. Brings excellent time management and collaboration skills, paired with a proactive, growth-focused mindset that turns challenges into meaningful contributions. Eager to apply hands-on experience in CI/CD automation and cloud deployment to build efficient, scalable software solutions in a professional environment.

EDUCATION

Knowledge Institute of Technology, B.Tech in Computer Science and Business Systems. Present
CGPA: 8.64

Vaigai Matriculation Higher Secondary School, HSC – Maths, Physics, Chemistry, Biology. 06/2021 – 05/2022
- 84%

Vaigai Matriculation Higher Secondary School, SSLC – Maths, Science, Social Science. 06/2019 – 05/2020
- 92%

SKILLS

Programming Language
Java
Platform
GitHub, Google Colab

DevOps, CI/CD Tools
Jenkins, Docker
Tools
Visual Studio Code

Project Management Tool
JIRA

Cloud Platform
AWS

PROJECTS

Blue-Green Deployment 02/2026 – 03/2026
- Designed and implemented a Blue-Green Deployment strategy on **AWS** to minimize downtime and release risk by maintaining two identical production environments — Blue (current live version) and Green (new version).
- Used **Docker** for containerization, ensuring consistent and reliable application behavior across both environments.

Student Complaint Management System 03/2026 – 04/2026
- Developed a web-based platform using **Java** for backend logic, enabling students to submit, track, and manage complaints related to academic and campus issues.
- Implemented complaint status tracking (Pending, In Progress, Resolved) using [SQL] to improve transparency and ensure timely resolution.
- Built the system with [HTML/CSS/JS] to provide students an intuitive interface for complaint submission and tracking.

CERTIFICATIONS

- Agile-Based Project Automation with DevOps — L&T EduTech
- Fundamentals of Agile Methodology with DevOps Integration — L&T EduTech
- Prompt Engineering — Infosys Springboard
