PROFESSIONAL SUMMARY

B.Sc. Computer Science graduate (2026) specializing in Python, AI/ML, and backend development. Experienced in building REST APIs with FastAPI, developing CNN-based computer vision applications, and working with PostgreSQL and SQLite. Hands-on experience integrating Ollama/Qwen models into a multimodal AI chatbot. Strong foundation in Python, OOP, DSA, Git, and Linux, seeking to contribute as a Python Developer, Backend Developer, or AI/ML Engineer.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript

Backend Framework: FastAPI

AI / Machine Learning: Machine Learning, Deep Learning, CNN, Computer Vision, Image Processing

Databases: PostgreSQL, SQLite, SQL

Development: REST APIs, API Integration, Authentication, OOP, Data Structures & Algorithms, Debugging, Git, Linux

Frontend & Design: HTML, CSS, JavaScript, Figma

PROJECTS

Maveric AI – Multimodal AI Chatbot

Python | FastAPI | LLM (Ollama/Qwen) | Flutter | PostgreSQL/SQLite | 2026

- Developed a multimodal AI chatbot using Python and FastAPI, integrating Ollama-hosted Qwen LLMs to support text, image, and voice-based conversational interactions.
- Designed REST APIs for authentication, conversation management, file/image handling, and AI model communication, with persistent conversation history stored in PostgreSQL/SQLite.
- Implemented speech-to-text and text-to-speech pipelines alongside image understanding to enable multimodal, asynchronous user interactions.
- Built secure authentication with Google Sign-In and OTP-based password reset, and deployed the backend to production using Render.

Plant Disease Detection & Agricultural Advisory System

Python | CNN | Deep Learning | Computer Vision | 2026

- Built a Convolutional Neural Network (CNN) to classify plant leaf diseases from user-uploaded images, applying deep learning and computer vision techniques.
- Developed a REST backend to serve the trained model and return real-time disease predictions with confidence scores.
- Designed an advisory interface translating model predictions into actionable remediation guidance for non-technical users.

Leftover Food Distribution Application

Salesforce Platform | Cloud | Data Modeling | 2025

- Engineered a cloud-based application (Naan Mudhalvan Scheme) connecting surplus food donors with NGOs to reduce food wastage.
- Designed custom data models and automated workflows to streamline donor-to-NGO logistics coordination.

Digital Portfolio Website

HTML | CSS | JavaScript | 2024

- Developed a fully responsive personal portfolio website to showcase projects and technical skills, optimizing assets for fast load times across devices.

EDUCATION

Bachelor of Science in Computer Science

Sri Vasavi College (Aided), Erode, Tamil Nadu | Jul 2023 – Apr 2026 | Cumulative Marks: 70%

Higher Secondary Education (Class XII)

Model School, Sankari, Salem, Tamil Nadu | Jul 2022 – Apr 2023 | Result: 76%

CERTIFICATIONS

- Agentic AI, DeepLearning.ai (2026)
- 200-Hour Artificial Intelligence & Machine Learning Training, FUEL NGO (2026)
- IT/Analyst Roles, AMCAT (2026)

AWARDS

- First Place Winner, Prompt Builder Competition, Periyar University, Salem (2025)
