SEVAG RAHUL G G
AI Engineer | Generative AI | Agentic AI | RAG | Voice AI
sevagrahul39@gmail.com | +918825489028 | Coimbatore | LinkedIn: linkedin.com/in/sevag-rahul

Summary

AI Engineer with hands-on experience in building and deploying AI solutions, including **RAG-based conversational chatbots, AI agentic automations, predictive AI, and voice AI agents**. Proven expertise in **machine learning, Natural Language Processing (NLP), BERT fine-tuning, vector databases, and Large Language Model (LLM) integrations**. Experienced in designing and implementing **real-time AI systems** and custom API tools to automate complex business workflows and enhance data-driven decision-making. Dedicated to collaborating in fast-paced environments to deliver **scalable, high-impact AI solutions**.

Key Achievements

Enterprise AI Delivery
Delivered AI solutions across Voice AI, Conversational AI, RAG, AI Agents, and automation for multiple enterprise clients.

Platform Development
Contributed to the development of EasyVoice and EasyChat, covering AI orchestration, knowledge retrieval, tool calling, real-time voice interaction, and enterprise integrations.

AI Automation
Developed multiple AI-powered automation solutions including Auto Tagger, GST Validator, Web Scraping Agents, Email Bots, and WhatsApp Bots.

Production AI
Designed and deployed domain-specific AI agents and assistants for customer support, sales, HR, grievance handling, internal helpdesk, and business workflows.

Advanced AI Engineering
Applied RAG, Multi-Agent Systems, LangGraph, LangChain, Knowledge Graphs, LLM fine-tuning, and Voice AI in enterprise projects.

Experience

Kambaa Inc - Saas 360 — Peelamedu, Coimbatore
AI Developer — 05/2025 - Present

- Designed an **Enterprise AI Voice Platform** for real-time, low-latency Voice AI Agents using Speech-to-Speech (S2S), Speech-to-Text (STT), and Text-to-Speech (TTS) pipelines, with WebRTC, LiveKit, and Pipecat integrations.
- Built an **Enterprise AI Conversational Platform** leveraging Retrieval-Augmented Generation (RAG), vector databases (FAISS), and custom API tool calling to deliver context-aware customer support, sales automation, and intelligent business workflows
- Designed and deployed domain-specific enterprise Voice AI agents equipped with custom Voice Activity Detection (VAD) and multilingual audio processing for high-throughput operational environments.
- Executed autonomous agentic automation solutions including Auto Tagger, GST Validator, Web Scraping Agents, Email Bots, and WhatsApp Bots using CrewAI, Agno, LangGraph, and LangChain for multi-step workflow execution.
- Fine-tuned BERT and transformer models for task accuracy, sentiment analysis, and intent classification, while applying rigorous prompt engineering for OpenAI LLM integrations.
- Collaborated with cross-functional teams to integrate real-time AI models into FastAPI microservices, handling production debugging, performance optimization, Freshworks ticketing platform integration, and Web UI integrations.

Claidas Technologies Karapakkam, Chennai
Cloud Engineer Intern 09/2024 - 02/2025

- Provisioned and configured **Virtual Machines (VMs)** and cloud infrastructure on **Microsoft Azure** and **AWS** to support scalable application hosting.
- Developed and deployed automated infrastructure scripts to streamline routine operational tasks, system provisioning, and resource management.
- Managed cloud resource monitoring, network configurations, load balancing, and infrastructure security assessments to optimize platform performance.

Skills

Generative AI & Agentic AI: AI Agents, CrewAI, Agno, LangChain, LangGraph, LLM Integrations, Prompt Engineering, Function Calling
RAG & Knowledge Systems: Retrieval-Augmented Generation (RAG), Hybrid Search, Semantic Search, Vector Search, Knowledge Graphs
Conversational & Voice AI: Voice AI Agents, Speech-to-Speech (S2S), WebRTC, LiveKit, Pipecat, Chatbots
AI / Machine Learning: Predictive AI, Natural Language Processing (NLP), Model Fine-Tuning (BERT)
Development & Platforms: Python, FastAPI, REST APIs, Freshworks
Databases & Data: FAISS, Qdrant DB, PostgreSQL
Cloud & DevOps: AWS, Microsoft Azure, Docker, OpenTelemetry, CI/CD Pipelines, Model Deployment
Analytics: Power BI, Data Visualization, Performance Metrics Monitoring

Projects

- **Enterprise AI Voice Platform** – Spearheaded a low-latency Voice AI system integrating Speech-to-Speech (S2S), STT, LLM inference, and TTS pipelines with WebRTC and LiveKit to facilitate automated conversational interactions in real time.
- **Enterprise AI Conversational Platform** – Built an enterprise-grade chatbot framework leveraging dynamic RAG, GraphRAG, and knowledge graphs with FAISS and Qdrant DB vector search and tool-calling capabilities. Integrated seamlessly with email, ticketing platforms (Freshworks), and other enterprise systems to deliver context-aware automated support responses and workflow automation.
- **Enterprise Voice AI Solutions** – Formulated production voice agents equipped with custom voice activity detection (VAD) and multilingual audio processing for high-throughput client environments.
- **Enterprise AI Chatbots & Assistants** – Deployed conversational assistants integrated with internal CRM and knowledge bases using hybrid vector search and API function calling for customer support, HR, and sales.
- **AI Agentic Automations** – Deployed autonomous agent workflows using CrewAI, Agno, LangGraph, and LangChain for Auto Tagger, GST Validator, Web Scraping Agents, Email Bots, and WhatsApp Bots.
- **LLM Fine-Tuning & NLP** – Fine-tuned transformer models (BERT) for text classification, sentiment analysis, and intent extraction, combined with engineered prompts for OpenAI LLMs.

Education

K S Rangasamy College of Technology 2020-2024
B.Tech – Artificial Intelligence & Data Science **83%**
