Professional Summary

Computer Science Engineering student with hands-on experience building full-stack Java and MERN applications through an internship, independent projects, and hackathons; proficient across frontend, backend, REST APIs, authentication, and databases.

Education

Mahendra College of Engineering, Salem **2023 – 2027**
B.E. Computer Science and Engineering CGPA: 73.4
Relevant Coursework: Data Structures and Algorithms (Java), Object-Oriented Programming (OOP), Full Stack Development, Database Management Systems (DBMS), Software Engineering

Technical Skills

Languages: Java, JavaScript, TypeScript, SQL
Frontend: ReactJS, HTML5, CSS3, Responsive UI
Backend: Spring Boot, Hibernate, JDBC, REST APIs, JWT
Databases: MySQL, PostgreSQL
Cloud & DevOps: Docker, AWS Basics
Tools: Git, GitHub, Postman

Professional Experience

Stellera Edu Tech **Oct 2025 – Dec 2025**
Full Stack Development Intern

- Delivered end-to-end web application features by developing frontend interfaces and backend functionality.
- Designed and integrated REST APIs to support dynamic, requirement-driven application functionality.
- Implemented CRUD operations and database queries for core application data management.
- Tested, debugged, and resolved functional issues through systematic troubleshooting before release.
- Collaborated with team members across development, testing, and maintenance phases to deliver application features.

Projects

Food Delivery Application *ReactJS, Spring Boot, PostgreSQL, JWT*

- Developed a full-stack food delivery application allowing users to browse food items, manage carts, and place orders.
- Implemented user authentication, food browsing, cart management, order placement, and order tracking functionalities.
- Developed REST APIs using Spring Boot and integrated them with the ReactJS frontend for core food ordering workflows.
- Integrated PostgreSQL for storing and managing user, food, cart, and order data.
- Implemented JWT-based authentication to secure user access and protected application features.

Jarvis AI Chatbot GitHub Live Demo

- Built a responsive AI chatbot interface using HTML5 and CSS3 with a clean and interactive user experience.
- Integrated the Google Gemini API using JavaScript and Fetch API to send user messages and display AI-generated responses.
- Implemented chat history using LocalStorage along with typing indicators, new chat functionality, and basic error handling.

Product Management REST API GitHub

- Engineered a RESTful API using Java and Spring Boot with CRUD operations, secured through JWT-based authentication and authorization using Spring Security.
- Architected the application using Controller, Service, Repository, Entity, and DTO layers with Spring Data JPA and PostgreSQL.
- Implemented access and refresh token authentication and global exception handling for consistent API responses.

Achievements

- **Finalist, Communication Contest** – selected among competing participants across Mahendra Institutions.
- **Finalist, CATCH 26** – selected among competing teams across Mahendra Institutions.

Certifications

Full Stack Development Course – GUVI | HCL
DevOps Fundamentals Course: CI/CD Automation & Cloud DevOps – GUVI | HCL
ReactJS Development Certification – Infosys Springboard
JavaScript Programming Certification – Infosys Springboard
