PROJECTS

Project Title 1 | **AI Based Visual Product Identification For Blind**

- Visually impaired people may face difficulty identifying everyday products independently.
- Manual assistance is often required to recognize packaged items and surrounding objects.
- A portable, low-cost wearable system can capture visual information and convert it into audio feedback.

Project Title 2 | **ESP32 CAM FACE DETECTION DOOR LOCK SYSTEM**

- Traditional door locks can be lost, stolen, or misused.
- The proposed system uses ESP32-CAM face detection to verify a person and control the door lock.
- The system improves security, convenience, and access control.
