OBJECTIVE

B.E. Electronics and Communication Engineering graduate (2026) with hands-on experience in Embedded Systems, C, C++, and electronics Fundamentals. Possess strong analytical, problem-solving, and teamwork skills, seeking an opportunity to apply my technical knowledge and contribute to innovative engineering and technology-driven projects while continuously learning and growing professionally.

EDUCATION & SKILLS

BE – Electronics & Communication Engineering
Sona College of Technology | 2022–2026
CGPA: 7.96/10
XII: Vedhha Vikass School, Salem | 78% (2022)
X: Vedhha Vikass School, Salem | 89.6% (2020)

Technical Skills
Hardware: Digital & Analog Electronics, Embedded System, VLSI Fundamentals
Tools: LabVIEW, MATLAB
Programming: C, C++, SQL
Soft Skills: Team collaboration, Adaptability, Analytical Thinking, Problem-solving
Languages: Tamil, English (R/W/S)

PROJECTS

Underground Cable Fault Detector | Arduino, GSM
2026

- Developed a Machine Learning-based underground cable fault detection system that identifies fault locations and sends alerts through GSM communication.
- Performed testing and validation to improve fault detection accuracy and ensure reliable system performance.

Smart Sprinkler Management System | ESP32, DHT11
2025

- Developed an IoT-based smart sprinkler system for real-time temperature and humidity monitoring with automated sprinkler control.
- Performed sensor calibration, testing, and validation to ensure reliable system performance and efficient water management.

INTERNSHIP

AI-Driven Fleet Analytics (NeuroFleetX) | Infosys Springboard *Jan–Mar 2026*

- Developed an AI-driven fleet management platform with real-time vehicle tracking, route optimization, and REST API integration.
- Collaborated on data analysis, documentation, and system testing to improve performance and support reliable operations

CERTIFICATIONS & ACHIEVEMENTS

Certifications

- IoT (75%) — NPTEL
- Python Basics — Infosys Springboard
- LabVIEW Fundamentals — Digitoad | Jul 2024
- MATLAB Onramp — MathWorks | May 2024

Achievements

- First Prize, Hackquest — PSG College | Mar 2025
- Event Coordinator, Electroblitz | Oct 2024

Area of interest

- Embedded Systems
- VLSI design
- Microcontroller Programming
- Internet of Things (IoT)
- Product Development
