PROFESSIONAL SUMMARY

Detail-oriented Cybersecurity graduate with hands-on experience in AWS cloud security and secure web infrastructure deployment. Proficient in implementing robust authentication measures and network security protocols. Seeking an entry-level cybersecurity role to leverage practical skills in vulnerability mitigation, system administration, and cloud architecture to protect organizational assets.

TECHNICAL SKILLS

Cloud Platform: AWS (EC2, VPC, IAM, Systems Manager, WAF, Cognito)

Security: Vulnerability Mitigation, Web Application Firewall (WAF), Offensive Security (Basic), Access Management

Networking: TCP/IP, Subnetting, DNS, AWS VPC, Wireshark (Basic)

Operating Systems: Linux (Basic), Windows Server

Programming & DB: Python (Basic), SQL (Basic)

CS Fundamentals: Data Structures – Arrays, Linked Lists, Stacks, Queues, Trees, Graphs (Theoretical)

Cloud Concepts: IaaS, PaaS, SaaS, Public/Private/Hybrid Deployment Models, Basic Cloud Architecture

Productivity Tools: Microsoft PowerPoint (Proficient), Microsoft Word (Experienced)

EDUCATION

Manonmaniam Sundaranar University, Tirunelveli *Graduation: 2026*

Bachelor of Science in Cybersecurity

PROFESSIONAL EXPERIENCE

IT & Cloud Security Intern — J7 Technology Solutions Pvt. Ltd., Alangulam *June 2025*

- Configured and managed AWS cloud infrastructure including EC2 instances, VPC environments, and IAM roles — supporting access provisioning and system readiness.
- Maintained and monitored system infrastructure using AWS Systems Manager, following documented operational procedures.
- Assisted senior engineers with identity access controls, environment configuration, and basic incident documentation.

Offensive Cybersecurity Intern — InLighnX Global Pvt. Ltd.

- Performed vulnerability scanning and system analysis, documenting findings and escalating issues following structured procedures.
- Gained hands-on exposure to system weaknesses, diagnostic data collection, and security incident reporting.

ACADEMIC & TECHNICAL PROJECTS

Secure Web Application Deployment on AWS | AWS EC2, VPC, WAF, Cognito, Systems Manager

- Deployed a scalable web architecture with isolated network resources, environment readiness checks, and access controls via custom VPCs and IAM roles.
- Configured AWS WAF to defend against web exploits and integrated Amazon Cognito for strict user authentication and access management.
- Maintained operational documentation including configuration steps, access records, and system setup procedures.

Basic Network Traffic Analysis using Wireshark | Wireshark (Beginner Level)

CERTIFICATIONS

- Introduction to Cybersecurity – CISCO Networking Academy
- Generative AI – IBM
- Cybersecurity Fundamentals – CYBEREXAM
- Cybersecurity Analyst Job Simulation – TATA
