MOHAMMED ASIF Y

ENGINEERING FRESHER | PYTHON

Erode, Tamil Nadu | +91 9123522545 | bharkathyunus@gmail.com

CAREER OBJECTIVE

Engineering fresher with a strong foundation in Python, SQL, analytical problem solving, and practical project development, seeking an opportunity to contribute to real-world projects. Brings hands-on experience through data-driven applications, software projects, internships, hackathons, and technical events, with a strong ability to adapt to new teams, take responsibility for tasks, and turn ideas into practical solutions.

TECHNICAL & PROFESSIONAL SKILLS

Programming: Python
Database: SQL
Tools: Git, GitHub
Analytics & Visualization: Power BI, Excel
Soft Skills: Adaptability, Team Integration, Initiative

INTERNSHIP EXPERIENCE

Brainayspot Technology | Data Analysis Intern | Dec 2025 – Jan 2026

- Cleaned and preprocessed structured datasets using Python and Excel to improve data quality and consistency.
- Performed exploratory analysis to identify trends, anomalies, and actionable insights.
- Wrote SQL queries to extract, filter, and aggregate business data for reporting.
- Developed dashboards and KPI reports to communicate analytical findings.

PROJECTS

Amazon Product Review Analysis
- Analyzed product review data to study rating distribution, review frequency, and customer feedback patterns, generating useful product and customer insights.

Smart Theft Detection System
- Developed a practical project focused on identifying suspicious activities and potential theft scenarios, with emphasis on automated detection and real-world usability.

Expense Calculator & Tracker
- Developed an expense tracking application to record, categorize, and analyze personal spending, with analytics and prediction-oriented features to help users understand spending patterns and plan future expenses.

Sales Performance Dashboard
- Cleaned and analyzed sales data to identify revenue trends, product performance, and key business metrics. Designed an interactive dashboard to present KPIs and support data-driven decisions.

E-Commerce Sales Analysis Dashboard
- Analyzed e-commerce order data to understand customer segments, sales trends, revenue contribution, product performance, and repeat-order behavior.

ACHIEVEMENTS & PARTICIPATION

Second Prize – Paper Presentation, ELANTRA 2K26
- Presented the Expense Calculator project at the technical event and secured Second Prize.

Project Expo Participant – BARNSTROMZ-2K25 | Hindusthan Institute of Technology
- Participated in the National Level Technical Symposium Project Expo with a Hospital Management System project.

VIBATHON Participant | KSR College of Engineering | September 2025
- Participated in VIBATHON, an AI-based hackathon conducted by KSR College of Engineering.

EDUCATION

B.Tech – Artificial Intelligence and Data Science
Excel Engineering College | 2023–2027

Higher Secondary Education
Government Higher Secondary School
