PROFESSIONAL SUMMARY

Motivated Computer Science and Business Systems undergraduate with strong foundations in full stack development, data structures, and AI/ML concepts. Skilled in developing scalable web applications using React.js, Node.js, Flask, Firebase, and modern development tools. Passionate about problem solving, software engineering, and building impactful technology solutions.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript

Frontend: HTML, CSS, React.js

Backend: Node.js, Flask

Databases: MySQL, Firebase, Supabase

Tools: Git, GitHub, VS Code, Postman

CS Fundamentals: Data Structures & Algorithms, Object Oriented Programming

PROJECTS

Resume Ranker | ***React.js, Flask, AI/ML*** GitHub

- Built an AI-powered resume screening and ranking platform using machine learning concepts
- Developed React frontend and Flask backend for ATS-style resume analysis

Fake Website Detector | ***Python, Flask, Machine Learning*** GitHub

- Developed a phishing website detection system using machine learning techniques
- Implemented URL analysis and prediction features with a user-friendly interface

AI Eye Tracking System | ***Python, OpenCV, AI*** GitHub

- Built an AI-based eye tracking application using computer vision and OpenCV
- Implemented real-time gaze detection for accessibility and interaction applications

Datathon CIT | ***Python, Data Analytics*** GitHub

- Performed data preprocessing, visualization, and analytical reporting on real-world datasets
- Generated insights to support data-driven decision making and problem solving

SAIL Java Management System | ***Java, MySQL*** GitHub

- Developed a Java-based management system with CRUD operations and MySQL integration
- Designed backend modules following object-oriented programming principles

EXPERIENCE

SAIL - Steel Authority of India Limited Jan 2026 – Apr 2026
E-Pathshala Platform Project | Learning & Development Department Salem

- Contributed to the development and enhancement of the E-Pathshala digital learning platform for employee training and knowledge management.
- Collaborated with the Learning & Development department to understand requirements and support digital learning workflows.

NSIC Web Development Program 2025
Web Development Trainee Remote

- Completed hands-on training in web development covering frontend design, responsive layouts, and modern development practices.
- Developed web pages and implemented core concepts of HTML, CSS, JavaScript, and web application development.

NXRA Insights Pvt. Ltd. 2025 – Present
Software Engineering Intern Remote

- Contributing to application development and web-based solutions using modern software development technologies and workflows.
- Supporting development activities across web development, application design, and digital solutions.

NIT Trichy Cybersecurity Hackathon 2025
Hackathon Participant Trichy

- Participated in a cybersecurity-focused hackathon involving secure system design, problem solving, and technical collaboration.
- Worked with a team to analyze challenges and develop innovative technology-driven solutions.

Datathon Competition - CIT 2025
Datathon Participant Coimbatore

- Analyzed datasets and applied data-driven approaches to solve real-world analytical problems during the competition.
- Performed data preprocessing, visualization, and insight generation using analytical techniques.

EDUCATION

Excel Engineering College (Autonomous) 2023 – 2027
B.Tech in Computer Science and Business Systems | CGPA: 8.0 Final Year Student (2026–2027)

Little Flower Matriculation Higher Secondary School 2021 – 2023
Higher Secondary Certificate (HSC) | 80% Salem

Sri Vidya Mandir Higher Secondary School 2020 – 2021
Secondary School Leaving Certificate (SSLC) | 75% Salem

ACHIEVEMENTS & CERTIFICATIONS

- Completed Infosys certification courses in Programming using Java and Data Structures using Java
- Completed NPTEL certification in Data Structures and Algorithms using Java
- Participated in Accenture Go for Gold learning and development program
- Completed Forage software engineering job simulation program focused on real-world development workflows
- Actively practicing Data Structures and Algorithms for software engineering interview preparation
- Built multiple AI-based and full stack development projects focused on real-world problem solving
- Participated in technical workshops, internships, hackathons, and software development programs
- Certificates and supporting documents: View All Certificates
