Projects

Automated Passenger Entry Validation and Monitoring System in Train

Role: Project Lead

Tools: Arduino IDE, Proteus, Relay Modules

• Designed and developed an automated passenger validation system for trains using RFID technology and sensors to perform real-time ticket verification and movement tracking. Enhanced security, minimized human errors and streamlined the boarding process.

Smart Refrigerator Monitoring System

Role: Circuit Design

Tools: Arduino IDE, Python, OpenCV, TensorFlow

• Developed a freshness monitoring system using a gas sensor and camera. Integrated Arduino Uno with Python, OpenCV and TensorFlow for real-time classification, enabling proactive spoilage alerts and reducing waste.

Skills & Proficiencies

Technical Skills: Circuit Design, Power System

Soft Skills: Problem-Solving, Analytical Thinking, Teamwork, Adaptability

Certifications

• Embedded Systems using C

• Data Analysis and Visualization with Power BI

• Physics of Renewable Energy Systems

Co-Curricular

• Attended a workshop on Bug Bounty at Paavai Engineering College

• Won 1st place in 'Electric Detective' intercollege competition at Karpagam Academy of Higher Educaion

Languages Known

- Tamil
- English

Areas of Interest

• Electric Power Generation

• Renewable Energy Integration
