SUMMARY

Final-year Computer Science and Engineering student skilled in Python, Java, JavaScript, React.js, Node.js, MongoDB, and AI technologies. Experienced in developing full-stack web applications, AI-powered systems, and smart mobility solutions. Strong problem-solving and software development skills with a keen interest in Artificial Intelligence, Machine Learning, and emerging technologies.

EDUCATION

EXCEL ENGINEERING COLLEGE – AUTONOMOUS ***2023 - 2027***
B.E. in Computer Science and Engineering *CGP: 7.8 / 10*

GOVERNMENT BOYS HIGHER SECONDARY SCHOOL ***2023***
HSC *Percentage: 65*

INTERNSHIPS & TRAINING

Mobile App Development Intern | *ALO Info-Tech Pvt. Ltd., India* ***16 June 2025 — 25 June 2025***

- Developed and tested mobile application features using front-end and back-end technologies.
- Implemented UI/UX designs and integrated APIs to improve functionality and user experience.
- Performed application testing and basic performance optimization.

UI/UX Design Intern | *ZORO TECH, India* ***10 December 2025 — 31 December 2025***

- Applied UI/UX design principles to create intuitive and user-friendly interface designs
- Designed wireframes and visual layouts focusing on usability, consistency, and user experience
- Collaborated on design improvements by following user-centered design methodologies.

PROJECTS

PetitionAI — AI-Powered Grievance & Petition Management System |
React, TypeScript, FastAPI, MongoDB, Python, Gemini AI ***Aug2026***

• Developed an AI-powered grievance management platform for analyzing and managing citizen petitions.
• Implemented AI-based classification, sentiment analysis, priority prediction, and duplicate grievance detection.
• Built role-based workflows for Citizens, Officers, and Admins with petition tracking and status management.
• Integrated Gemini AI for image analysis and FastAPI REST APIs with JWT authentication.

Smart Cafe App — AI-Based Ordering & Analytics System | *React, Node.js, MongoDB, AI Analytics* ***Jan 2026***
• Developed an AI-powered cafe management platform with digital ordering and analytics features.
• Implemented menu management, order tracking, and customer engagement functionalities.
• Designed responsive dashboards to provide business insights and improve operational efficiency.
• Enhanced user experience through intuitive UI/UX and real-time data management.

Vision Sign — AI Sign Language Recognition System | *Python, OpenCV, Machine Learning* ***Aug 2025***
• Developed an AI-powered system to recognize sign language gestures in real time.
• Applied computer vision and machine learning techniques for gesture classification.
• Converted recognized gestures into text to improve communication accessibility.
• Optimized recognition accuracy and system responsiveness for practical usage.

Mind Ease — Mental Health AI Assistant | *React, JavaScript, AI Technologies* ***Jan 2025***
• Built an AI-powered mental wellness platform for emotional support and self-assessment.
• Implemented mood tracking and personalized wellness recommendations.
• Designed an intuitive and accessible interface focused on user engagement.
• Enhanced user experience through AI-driven interactions and support features.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript | **Frontend Technologies:** HTML, CSS, React, Tailwind CSS
Backend Technologies: Node.js, Express.js , FastAPI | **Databases:** MongoDB, Supabase
AI & Technologies: Artificial Intelligence, Machine Learning, Computer Vision, Gemini AI.
Tools & Platforms: Git, GitHub, VS Code, Postman, Vercel
