CAREER OBJECTIVE

Electrical and Electronics Engineering graduate (2026) with a solid foundation in power systems, electrical machines, and circuit analysis. Hands-on internship experience in solar panel installation and configuration, with a project background in IoT-based renewable energy automation. Seeking an entry-level opportunity in the core electrical engineering sector or IT sector, to apply technical knowledge and contribute to organizational growth.

EDUCATION

B.E. — Electrical and Electronics Engineering *2022 – 2026 (Completed)*
Government College of Engineering, Dharmapuri | CGPA: 7.74 / 10

Higher Secondary (Maths & Biology) *2022*
Sri Vijay Vidyalaya Matriculation Hr. Sec. School, Dharmapuri | 81.6%

Secondary School (SSLC) *2020*
Sri Vijay Vidyalaya Matriculation Hr. Sec. School, Dharmapuri | 91.4%

TECHNICAL SKILLS

- Circuit Design & Simulation: MATLAB
- Programming & Data: Python (Basic), HTML (Basic), Power BI (Basic)
- Productivity Tools: MS Office (Word, Excel, PowerPoint)
- Emerging Skills: Prompt Engineering

INTERNSHIP EXPERIENCE

Solar Technician Intern — Sambhav Foundation *Duration: 1 Month*

- Worked hands-on with solar energy systems, including panel installation and configuration.
- Assisted in testing and evaluating solar panel layouts to support efficient energy output.
- Gained practical, field-level exposure to renewable energy systems and equipment handling.

ACADEMIC PROJECT

Smart Solar Power Irrigation System with IoT Monitoring and Control

- Designed a solar-powered, IoT-enabled irrigation system for automated agricultural water management.
- Implemented microcontroller-based automated control of pump and valve operations to improve irrigation efficiency and reduce water wastage.
- Built a renewable-energy-based solution with cloud monitoring, enabling a sustainable and cost-effective farming application.
